## **ACKNOWLEDGEMENT**

Bismillahirrahmanirahim ..

Praise be to Allah, the Lord of hosts. Prayers and peace be upon the great beloved Prophet Muhammad Sallallahu 'Alaihi blessings and peace. Grateful to God for enabling that has given me the opportunity to successfully complete this academic writing. I would like to express my deepest appreciation and gratitude to all parties involved especially to Madam Nor Fadzilla Ibaruslan as thesis supervisor who has provided guidance with patience and contribution of ideas for this study. Her invaluable help of constructive comments and suggestions throughout the experimental and thesis works have contributed to the success of this research.

Not forgotten, my appreciation to the Sir Joil bin Bombon as Senior Director Assistant at Paya Indah Wetlands which have been provide information in completing this project.

Last, but by no means least, to my family especially my who always support and motivate throughout my studies and my friends some of them also help me prepare this thesis. They were always supporting me and encouraging me with their best wishes. For this contributions, the goodwill, cooperation and the memory of this will not be forgotten. To those who indirectly contributed in this research, your kindness means a lot to me.

Thank you very much.

## INTRODUCTION

The purpose of this study is to create a good patterns of behavior of individuals, groups, and society as a whole towards the environment fun, learning and conservation of nature. This research is done through a qualitative data collection using questionnaire instrument and its involved visitors in Paya Indah Wetland. This questionnaire entitled 'Information Design of Fun and Learning Environment' is consists of two main parts which is Section A and Section B. section A covers the respondents background identity while in Section B stand the questions related to the study though. The collected data are been then analyzed and arranged in the form of charts.

This research has gone through sort of written process which is divided into chapters.

Chapter 1 is regarding the background research that overviewed the background of study based on literature reviews. In this case, researcher peeled back the previous study that related to financial management and problem.

Chapter 2 involved the objective and research methodology of the study. For this research, four possible objectives has been taken out and followed by research questions that are need to be answered from collected data. This section also explained the method that is used to acquire needed data.

In Chapter 3, the content discussed about analysis and findings that are obtained. The result will be able to resolve and answer the research question in earlier section.

Chapter 4 is the conclusion for the entire study. In this part, researcher concluded the whole information derived from all four section of research field.

*During the learning journey, visitors will learn about the importance of nature Paya Indah Wetland. Wetland as an important site for migratory birds and other wildlife.*
