ACKNOWLEDGEMENT

Alhamdulillah, praises and thanks to Allah because of His Almighty and His utmost blessings, I was able to finish this research within the time duration given. Firstly, my special thanks to my supervisor, Zarina Binti Zainol who had guided me and give me some tips on doing this project. I'm really grateful that she helped me by sharing all the information that she has and provide a good guidance.

Special appreciation also goes to my beloved parents Ismail Bin Zainol Abidin and
who had given support to finish my project. Without them
I will lost and could not finish my project within time.

Last but not least, I would like to give my gratitude to my dearest friend for their support too in finishing this project. My friend gives many guides and encourage me to do this project

ABSTRACT

Finding a Halal restaurant within a non-Muslim area is quite a burdensome for most people. Besides that, customer are not aware of restaurant's Halal status because the restaurant do not display their Halal status. So, this project will implement the mobile application that is called Halal Restaurant to give the customer a suggestion about the Halal restaurants nearby. The objectives of the project are to design and develop a mobile application that give information about Halal restaurant to the customer at Shah Alam, Selangor. The methodology used to develop this mobile application is Agile. The development of the mobile application needs Java codes to be created and it also needs the Google API to enable the GPS. The system has been successfully developed, and it is hoped to be implemented in the future.

Chapter 1

Introduction

This chapter provides the project background, problem statement, objective, project scope and the significance that led to this project.

1.1 Project Background

Customer is a person who buys goods or services from a shop or business. A customer is an individual or business that purchases another company's goods or services. Customers are important because they drive revenues without them, businesses have nothing to offer. They are the decider for the entrepreneur if the business are success or not. There are many types of business that can be held by an entrepreneur, for example is restaurant.

On the other hand, restaurant is a place where people pay to sit and eat meals that are cooked and served on the premises. They must has a good service to attract more customers to come and enjoy meals at the restaurant. Meals are generally served and eaten on the premises but many restaurants also offer take-out and food delivery services. Restaurants with great in appearance and offerings a wide variety of cuisines and service models ranging from inexpensive fast food restaurants and cafeterias, to mid-priced family restaurants, to high-priced luxury establishments.
