## ACKNOWLEDGEMENTS

*“In The Name of ALLAH, Most Gracious, Most Merciful and big Gratitude to Prophet  
Muhammad SAW”*

Alhamdulillah, praises and thanks to Allah because of His Almighty and His utmost blessings, I was able to finish this research within the time duration. Firstly, my special thanks to my supervisor and my thesis lecturer, Mdm. Zarina Zainol and Mdm. (Dr.) Zolidah Kasiran for the ideas, patience, motivated advices, constructive criticism, spending times, morale support and guiding me throughout the every process in completion of this thesis.

Special appreciation also goes to my beloved parents and whole family especially my mother, Sepiah binti Hanapi for her understanding and always prays for my success to reach this path of study.

Last but not least, I would like to give my gratitude to my lecturers and my entire classmate friend that involve in discussion, sharing idea and knowledge, brainstorming together and also help and support me to complete my every task on this project.

May Allah S.W.T bless all of you. Thank You.

## **ABSTRACT**

The fundamental reason of this project is children are unable to get hold for their parent to tell them about the activities or programs. There are some application and website that have been developed for this problem, however it have lack on certain part such as the notification. Therefore, this project have been developed which a website that help children to set the activities date, time and venue. When the information is saved then the website system will automatically send the notification to parent with popup message which view the detail of the activities or programs. This will alert parent about their children activities. Family member also can view all the activities that have been set in the website.

# CHAPTER 1

## INTRODUCTION

In this chapter, background of studies and problem statement will be described to know the reason of this website development. This chapter will discuss about overall of this project which include the objectives of this project, project aim, project scope and project significant.

### 1.1. Background of Study

According to a statistic, internet users in Malaysia have increased since 2000 until now. The population in Malaysia now is 30,751,602 and 21,090,602 people in Malaysia is the internet users. Internet had been used for everyday life work such as business, study, family matter and others. Nowadays, children are the most active user among internet users. They used it for game, social media and others. Beside that parent also one of an active internet user but for different purpose which they mostly used it for work and business. The most common device that internet user use to connect the internet is smartphone. It is because it easy to carry and can access the internet.

Children with busy parents may face difficulty to get hold to their parents to tell them about their activities or programs. Some children are able to tell their parent about their activities or programs, but on the other hands, parents tend to forget about what their children tell them. Therefore, some website and application had been developed for this problem. However, there are several problems with current website and application which bring this project being develop.
