# BACHELOR OF BUSINESS ADMINISTRATION WITH HONOURS (FINANCE) FACULTY OF BUSINESS MANAGEMENT UNIVERSITI TEKNOLOGI MARA KOTA KINABALU, SABAH

**JULY 2017** 

#### **ACKNOWLEDGEMENT**

The research project had been successfully and completed with the assistance of various authorities. I would like to thank everyone who helped and guided me in completing this research project.

First of all, I would like to praise to Allah SWT for giving me chances and space in conducting this study. I am grateful upon Him for giving me strength, courage and patients throughout this semester.

Second, I would like to thank to Universiti Teknologi Mara (UiTM) Kota Kinabalu for giving me the opportunity to handle and conduct this research. It allows me to learn and gain more experiences in conducting a research.

Third, I want to express gratitude to our advisor, Madam Yvonne, who is my advisor for subject of Industrial Training Project Paper (FIN672). I am very grateful for all the guidance, advices, suggestions, comments and commitment that were given throughout completing this research project.

Lastly, I would like to thank to my parents and friends who gave me support and help, whenever I needed an assistance regarding this research project.

**ABSTRACT** 

The aim of this study is to examine the relationship of firm size, asset

tangibility and retained earnings on financial leverage of firms listed in Bursa

Malaysia. The study is based on secondary data collected from Thomson-Reuters data

stream based on yearly basis for 5 years starting from period 2010 to 2014. The

regression method used is panel data component of 5 years. Independent variables are

firm size, asset tangibility, and retained earnings, while the dependent variable is

financial leverage. Overall result shows that firm size has positive but insignificant

relationship on financial leverage, while the asset tangibility also has positive relation

but is significant towards financial leverage. Retained Earnings on the other hand

shows that it has negative correlation but significant relationship on financial

leverage.

Keywords: financial leverage, firm size, asset tangibility, retained earnings
