Professor Nofri appointed as a Nonresident Fellow of the National Bureau of Asian Research (NBR)

Published on 29/1/2024

Congratulations to Prof. Ir Dr Nofri Yenita Dahlan, Director of Solar Research Institute (SRI), on her recent appointment as a Nonresident Fellow of the National Bureau of Asian Research (NBR), effective from January 2024.

NBR, an esteemed independent research institution with locations in Seattle and Washington, D.C., has chosen Prof. Nofri as a crucial addition to their network of experts. Nonresident Fellows play a pivotal role in advancing NBR's mission by contributing original research to ongoing programs, offering guidance on relationship development, proposing innovative projects, and suggesting potential avenues for engagement. They actively participate in events and activities, subject to their time and interest constraints, and are invited to serve a renewable four-year term.

Heartfelt congratulations once again, Prof. Nofri, on this well-deserved achievement!
