3D Printing Design Workshop Digital Innovation & Product Innovation for Public Servants of Selangor State

11-12 June 2024
Bilik UTV Technoventure,
(Bangunan UiTM-MTDC), UiTM Shah Alam

To support the Sustainable Development Goals (SDGs), BITCOM organized a 3D printing design training session on June 11-12, 2024, at UTV Technoventure Room, (UiTM-MTDC Building), UiTM Shah Alam.

The purpose of this training was to enhance the skills of Selangor State Public Servants in product prototype development using 3D printing design, and subsequently to encourage knowledge transfer in the area of additive manufacturing.

It is evident that this 3D printing design workshop training will generate innovative advancements, bringing along the potential to transform the way products are interpreted, designed, and produced, thereby creating new knowledge in preparation for rapid technological development in Malaysia.
