Acknowledgements

Praise to the Allah s.w.t as with His desire I can finish this final year project successfully. This is never been success if I do not ask for help with others or do it individually.

Firstly, I would like to thanks to my supervisor, Sr Mazlan Bin Abu Bakar for his co-operation, encouragement and advice throughout the whole semester in order to complete this research. After that, I would like to thank to my friends with the sharing of information on the research that I do.

I also wish to thank to all lecturers as much to encourage and motivate me to complete this thesis with easier. Lastly, I hope that everything that I've done will benefit us. I really hope that my explanation about this topic will assist us in future.

ABSTRACT

The relationship between fears of crime, criminal misconduct, the quality of life for local development is the level of increase is a concern by the public, traders and crime prevention practitioners. Individuals who have experience on the criminal behavior they will always feel safe when the road was in an empty, abandoned buildings and areas which were hidden from view. Therefore, Preventive Crime through Environmental Design CPTED implement by Dewan Bandaraya Kuala Lumpur is a concept created to serve as a permanent guideline to be applied by professionals in the planning of an early stage of development. The public must also cooperate with the support of the government's intention to make the Taman Tun Dr. Ismail is a city safe from crimes in total. Design an effective and correct to the functions of environmental requirements will reduce crime and the fear that it will lead to a better quality of life. Therefore, cooperation is needed from government agencies, residents, and city planners, professional designers in identifying security issues to the public during the new construction or renovation in a dwelling.

CHAPTER 1

1.0 INTRODUCTION OF STUDY

Nowadays, we know that many crimes and violence behavior had reported into the newspaper that occur at the area of predominant cities around the world and also happen in Malaysia. Many cases had reported before, indicates the crimes that had done by the criminals into the surveillance can be characterized which is robbery, women who was raped, people murdered, grazing, kidnapping, car park users, and also occur to people who is in at some residential housing and others area.

The crimes that occur will not with spontaneous without any opportunities by the criminals. More than 75 % crimes cased occur caused of the careless of victim about crimes awareness and also easy give the criminals to make crimes to them. But sometimes there are many factor encourage this crimes matter appear into residential area which is refer to imbalance composition and design layout of point focus of surveillance to make an activities at the area exposed to potential of crime occur by use this area with proprietorship.

So that, many approaches have been taken to ensure this matter can be avoid with become more severe where it should have oncoming intelligent ideas to make this problem solve and as a standardize guideline to follow in the near future. So that, created the new concept known as Crime Preventive through Environmental Design (CPTED) with somebody who has awareness of the crime activity by the inefficient compose design layout into residential area.
