ABSTRACT

UiTM is one university in Malaysia who want recognized and given the title as part of a Research University in Malaysia. Among the factors to be considered by the UiTM in the process of obtaining recognition as a research university is to strengthen the physical needs. Consistent with efforts to improve the quality and level of research at the Universiti Teknologi Mara (UiTM), university physical improvement must be improved. The physical requirements required by the postgraduate students and doctors of philosophy are in terms of improving the quality of library services and resources in teaching and learning facilities. Both of the physical needs are important and should be taken into account to achieve the level of Research Universities. To achieve the status Research University, UiTM need to comply with and fulfill the needs and conditions stipulated by the Ministry of Higher Education, and the facilities that need to be considered is in terms of classroom and library facilities. Both facilities are important in helping students, particularly post-graduate students and doctoral of philosophy in producing the quality research.

ACKNOWLEDGEMENT

Assalamualaikum W.B.T

Alhamdulillah, with the blessing of Allah, I had finished this project on time. First of all, I would like to thank Sr. Pn. Rohimah Khoiriyah Ariffin Harahap, coordinator for BSB 658 Academic Project II and also my supervisor for this subject, Sr. Ellemy Iskandar Khalid that had given us many supports and information during the progress of this research. Without their guideline, I cannot finish this project well.

Last but not least, a very special thanks to my family for their support and encouragement as I accomplished this dissertation. Besides that, I also would like to thank my friends and colleagues for all the help and support in order to help me in finished this dissertation.. Hope that this project will help me to improve my knowledge as future building surveyor. Once again, my lot of appreciation to all who are involve in this project. The best is from god, the weakness is from me.

Thank You.

CHAPTER 1

INTRODUCTION

1.0 INTRODUCTION

Every organization whether it is public or private must have a working premise appropriate for them to carry out the activities or the operation of an organization to achieve its objectives and their aims. Working premise is a basic requirement for placement of workers, machines, equipment, materials, documentation, information, space work, space transactions with customers and others. Usually works premises consisting of buildings and related facilities that referred to as the physical facilities of an organization.

Each country is described as a large organization in which government should provide adequate physical facilities and perfect for machinery and government employees to manage the country effectively. The Government of Malaysia
