GROUP: D1BM111/3A

PREPARED FOR:

MADAM IDARI BINTI ISMAIL

DATE OF SUBMIT:

25 June 2018

ACKNOWLEDGEMENT

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

ASSALAMUALAIKUM,

First for all, we want to offer thanks giving to God for this task finished. With all the commitment and cooperate from our group members and to our friends and classmates, we managed to complete for our task wisely. We also want to thanks Madam Idari for her helpful to teach us about this written report which is involved from our subject Introduction to Statistics (QMT181) that we need most in order to create written report titled “ Student’s Satisfaction Towards The Implementation Of Week Without Wall (WWW) “ and always be with when we facing any problem about this final project. She as well as our lecturer, always offering encouragement so that we can complete this task. This written report about Week Without Wall gives us more exposure about student’s satisfaction towards that implement in UiTM Machang. So the result of this study can also see the extent of enlightenment understanding of the implementation of the Week Without wall (WWW). We hope Madam Idari will like our final project. We also thanks to our senior also to my family because they helping us finished this assignment. We took a lot of effort for finished up our final project. And finally our final project became successfully.

1.0 INTRODUCTION

1.1 Background of Study

Week Without Wall (WWW) has been implemented at Universiti Teknologi Mara (UiTM) on commencing March 2018. Faculties and campuses plan for a Week Without Walls (WWW) for all or some courses which is students take responsibility and complete their learning tasks. Week Without Wall (WWW) means a week free from the normal classroom on campus. Students may study online, go global, go for field experience, be involved in service learning, assist community activities, learn from industry experts or any subject matter experts from other university, learn from peers, and much more without being confined to the four walls of the classroom. No lectures in class ! Instructors design the learning activities based on stipulated learning outcomes, monitor, and facilitated learning and assess the achievement of the outcomes. Learn Anywhere Learn Anytime Learn from Any Device.

1.2 Objectives of Study

The objective of the study on the Week Without Wall (WWW) is :

- a) To determine the student's consent of Weeks Without Walls (WWW).
- b) To know the students' opinions on the choice of tasks that more students choose during the Week Without Wall (WWW) being implemented.
- c) To study whether the lecturer gives correct instruction to the student on the implementation of the Week Without Walls (WWW).
- d) To determine the level of student satisfaction towards the implementation of the Week Without Wall (WWW).
