ACKNOWLEDGEMENT

Al-hamdu'lillah....with high gratitude to Allah who give me strength, spirits, and ideas for preparing and completing this dissertation. Completion of this final project took a great deal of concentrated and effort, which is impossible if it done without support co-operation of individual who involved. I wish to express my gratitude to the persons and all parties who have responded to the research and also offered their valuable contributions in carrying out this dissertation.

First and foremost I would like to express my appreciation and acknowledgement to my supervisor Sr. En Ghazali Mohd Amin who has given my guidance and encouragement also contribution of ideas in preparing my dissertation. My appreciation also extended to him his insightful supervisor, encouragement and his suggestion.

I also want to take this opportunity to extend my appreciation to all my friends who helping me by giving their moral support and assistant and for those who were directly or indirectly involved in completing dissertation.

My thanks also go to all those who agreed to be interview, formally and in formally and give me the benefit of their knowledge, views and experience. Finally, I would like to thank my beloved parents and family, who never stop giving me their encouragement and full support in order for me to complete the dissertation.

ABSTRACT

Water theme parks are may be use by many people or by the general public. While, the water theme park used for the recitation activity or family day or what any types of function for to recitation activity. The maintenance management of water services in water theme park is one of the importance to each water theme park in Malaysia. Every place of water theme park has their own management to ensure that each water management services running smoothly. In this country have many management services can we found. For the water park maintenance its related to water management the that handled the maintenance of water operations. The services must emphasized in the maintenance management to ensure the water used in water theme park does not have any pollution and disease can bring to consumers. Water should also change; manage to ensure clarity it is emphasized throughout the consumer of water during the operations. The water theme park must be always alert the water management to ensure that water used the water theme park does not have pollutions and disease can bring consumer. The water should also be change, manage to ensure clarity. The water must should have a relate to the running cost of operations, water usage, wastage of water, water control and water treatment its must should being doing a water treatment. So, this dissertation is made to identify the current approaches and system of maintenance, to investigate the issue and problems of the maintenance management of water theme park and to recommendation the best way to improving the maintenance and condition for the water theme park.

INTRODUCTION

1.1 TITLE

A STUDY ON MAINTENANCE MANAGEMENT OF WATER THEME PARKS

1.1.1 OVERVIEW OF TITLE

Being blessed with beautiful warm weather all year-round, Malaysia is the perfect place to enjoy theme parks and water parks. In the past few years, several exciting new theme parks have sprouted up all over Peninsula Malaysia. Many of these theme parks provide great fun for the whole family, sometimes offering a resort or shopping mall nearby.

Although all these parks are very different, they all share state-of-the-art design with fun and safety being priorities. There are some of the best theme parks in the region, surrounded by lush greenery and perfect weather. For a fun-filled time for the whole family, the time is now, the place is Malaysia.

As these places are used every day, thus lot of work in maintaining perspective should be considered. For example, water slide restoration, repair and recoating, maintenance and leak repair. The maintenance works for slide bed way maintenance consists of power washing, polishing, buffing, gel coat and others.
