

# **WOOD FINISHING: MATERIALS USED**

**By**

**Lizawati binti Mohamad Nor**

**Final Project Submitted in Partial Fulfillment for the  
Diploma in Wood Industry, Faculty of Applied Science,  
Universiti Teknologi MARA**

**November 2005**

## **ACKNOWLEDGEMENT**

First of all, I would like to thankful to our God, Allah s.w.t because give me the chance to complete this final project or thesis for this semester without any serious problems. Besides that, thanks a lot to my advisor, Prof. Madya Abdul Jalil bin Hj. Ahmad because of full supported during my study on Wood Finishing - Materials used. He also give me a lot of suggestion in choosing the topics of this thesis because I have a little problem in choosing a topic in the early of my study. Then, thanks again to Prof. Madya Abdul Jalil because of valuable signature as Head of Program of Diploma in Wood Industry beginning 1<sup>st</sup> of November 2005. In addition, thanks to all my friends batch Dec 2002 until Nov 2005 because of their cooperation during my presentation time.

I hope is study can improved my knowledge about finishing operation because we do not study this section in details.

## **ABSTRACT**

### **FURNITURE FINISHING: MATERIALS USED**

**By**

**LIZAWATI BINTI MOHAMAD NOR**

**NOVEMBER 2005**

Wood finishing more specifically on furniture making is a last treatment that we put on wood surface based on artwork and science. Then, the combination both of them will apply in surface layer with three terms of clear, moderate clear and not clear, to show the real wood beauty from finishing. At the same time, it can also make the wood surface more durable from weather; handicap, chemical components and it will increase the value of characteristics in furniture design. To get great finishing, we need to think about materials to be used first because right materials chosen will affect the result in the end of finishing operation. However, we need to have support from finishing techniques that we use because this reason can help us to know the right equipment that we need to use. So, here we can conclude that, we can achieve perfect finishing if we follow the finishing steps besides the experience from workmanship.
