## Acknowledgement

I am so grateful to Allah s.w.t. for all the bless and grace He had given to me so that I be able to had an opportunity to start and finish this academic project. Not to forget, our great beloved Prophet Muhammad, may Allah bless upon him.

Next, do not be left behind is my supervisor Sr Mazlan Abu Bakar who has provided good guidance every time we had consultation hours in order to make good this academic project. Without all the helps and guidance given by him, there is no way I am be able to finish this academic project, InsyaAllah.

A millions thanks to my mother , for all the supports and as always you are my motivation no matter what I am doing. As you always thought, never care about the reward, sincere and all out is the key of satisfaction.

Finally, to all my friends and those who are involved either directly or indirectly during the progress of this academic project, thanks a lot, only Allah may repay your kindness.

Thank You

## **Abstract**

This study is conducted in order to define various concept and understanding regarding the term sustainability. There are plenty school of thought regarding sustainable housing from all over the world. Therefore, it is necessary to understand what it means by the term through not only desk study but also case study. Next is to study guideline available in Malaysia in order to achieve sustainable housing. The elements and categories being evaluate by this particular guideline.

Last but not least is to investigate the level of understanding of public regarding sustainable housing. Also to be find out is the level of acceptance of public. at the end of this study, conclusion is made and few recommendations is given based on study conducted before.
