- MUHAMMAD ADIB BIN BAHARUDIN
(2017240128)
- ARIF FIKRI BIN ABDUL SALLEH
(2017261784)

ACKNOWLEDGEMENTS

Assalamualaikum w.b.t,

In the name of Allah S.W.T, the Most Gracious, the Most Merciful.

Praise be to Allah S.W.T, Lord of the universe, who gives the blessing and strength to complete this project paper for our group assignment. Peace and prayers be upon His Final Prophet and Messenger Muhammad S.A.W, the ideal role model for all human beings.

We cannot express enough thanks to my lecturer for their continued support and encouragement, Madam Salwani Binti Affandi. We offer our sincere appreciation for the learning opportunities and completing this Final Year Project for subject Fin 382.

Our completion of this project could not have been accomplished without the cooperation of our teammates, Shamsul arif, Syafirulhaizal, Arif Fikri, Adib, Darwish and Nazif. Thanks to our classmates as well for sharing information. The countless times we held a gathering in our hectic schedules will not be forgotten.

Finally, to all the speakers and other lecturer that teach us about company analysis. Your sharing knowledge and encouragement are much appreciated and duly noted.

DEVELOPED COUNTRIES

Economic Analysis of Developed Country G20

G20 country membership comprises a mix of the world's largest advanced and emerging economies, representing about most of the population of the worlds. 85 percent of global domestic product and over 75 percent of global trade. The member of G20 are Argentina, Australia, Brazil, Canada, China, France, Germany, India, Indonesia, Italy, Japan, Republic of Korea, Mexico, Russia, Saudi Arabia, South Africa, Turkey, United Kingdom, United States and the European Union.

For our report, we would like to sort out 4 of the G20 countries and analyses the economic health of the country and also to *make comparison with the current global economy*. The country that we choose are Japan, Germany, United States and China.

Based on our observation, these 4 countries influenced most of the current global GDP and becomes one of the countries that lead the global economy. The current hot issues about the world economy is trade war between United States and China. Both of the countries are pursuing and compete with each other to get the highest GDP. Their action makes the current stock market becomes unstable and little bit insane.

Japan has a market oriented and highly developed economy in the world and is a member of G20 and G7 countries. According to the IMF (International Monetary Fund) Japan has a GDP of around 5 trillion.

Germany is a highly developed social market economy. It has the largest national economy in Europe, the fourth-largest by nominal GDP in the world, and fifth by GDP. In 2017, the country accounted for 28 percent of the euro area economy according to the IMF. Germany is a founding member of the European Union.

Those are the factors of why we choose them to make the economy analysis.
