By

**NORLAILA BINTI AHMAD FAHMI**

Final Project Paper Submitted in Partial Fulfillment for the Diploma in Wood  
Industry,  
Faculty of Applied Science,  
Universiti Teknologi MARA,  
Kampus Jengka, Pahang.  
April 2005

## ACKNOWLEDGEMENT

First of all, I praise Allah the Al-Mighty for this is His will I success in finishing this final project. Without His will, I may never finish this project right on time.

Thanks to my advisor, Miss Mazlin, for being there when I need you and thanks for being so patient while checking my work. Sorry for disturbing your precious time. To Mr. Fauzi, thanks for your patience in teaching and following our work progress. I know my progress are slow but, thanks for your confidence, I made it.

To all my friends, boys and girls, thanks for being there. Even our project has nothing to do with each other's project; all of you help me made it just by being there. Your existence gives me strength to overcome all the barriers. Thanks for the encouragement.

To my beloved family, thanks for the encouragement and all the love you gave me. I can never say thank you enough for all your confidence in me. I can move forward due to your confidence in me.

Lastly, but not least, I would like to show my appreciations to whoever involve in making this final project directly or indirectly. To the officers in JPS, thanks for your time given to help me in finding the information that I need.

I will never be able to repay all your kindness to me. May Allah bless you.

## **ABSTRACT**

Forest is important to human, animals and fauna itself. Apart from providing shelter and foods, it acts as water catchments area and provides the environmental stability. The establishment of recreational forest is to reduce and minimizes deforestation. It also established as part of government step in maintaining the world stability. The study of recreational park is conducted in Selangor. The area of study is at the Kanching Recreational Forest, The Commonwealth Forest Park and Sungai Tua Recreational Forest. The data used is from secondary data that provided by Jabatan Perhutanan Selangor. The rivers, waterfalls and distance from residential area are among the factor that attracts visitors. By keeping up with maintaining the facilities and giving enough promotion, number of visitors can be increased.
