

TIMBER DRYING

BY;

MOHD KHUZAIRI BIN GHAZALI

**Final Project Paper Submitted in Partial Fulfillment for the Diploma in
Wood Industry, Faculty of Applied Science, Universiti Teknologi MARA**

APRIL 2005

TABLE OF CONTENT

APPROVAL SHEET	I
ACKNOWLEDGEMENT	II
LIST OF FIGURE	III
ABSTRACT	VI
ABSTRAK	V
CHAPTER	PAGE
1 INTRODUCTION	1
2 THE THEORY AND PRACTISE OF DRYING TIMBER.....	2
2.1 Factor Influencing the Drying of Wood in Air.....	3
2.2 Vapour Pressure and Relative Humidity.....	3
2.3 Temperature.....	4
2.4 Air Movement	6
2.5 Movement of Moisture in the Wood	7
2.6 Supply of Heat.....	8
3 METHOD OF DRYING WOOD IN AIR	9
3.1 Air Drying.....	9
3.2 Kiln Drying.....	10
3.3 Air Drying Followed by Kiln Drying.....	11
4 MOISTURE CONTENT OF TIMBER	12
4.1 Equipment Required	15
4.2 Interpretation of Moisture Content	16
4.3 Moisture Content Determination be Electrical Moisture Content...	17
4.4 Good Electrical Contact with the Timber	17
4.5 Measurable Range of Moisture Content.....	18
4.6 Moisture gradient	18
4.7 Variation in Electrical Resistance	19
4.8 The Effect of Temperature.....	19
4.9 Chemical in the Wood.....	20
4.10 The Manufacture's Instructions.....	21
4.11 Comparison of Methods.....	21
4.12 Advantages of the Oven Drying Method.....	21
4.13 Advantages of moisture Meter	22

5	THE PRE- DRYING OF TIMBER	23
	5.1 Sitting and Layout of Yard.....	24
	5.2 Foundations	25
	5.3 Size and Spacing of Stacking	26
	5.4 Pilling Stickers	27
	5.5 The Normal Method of Stacking	28
	5.6 Other Methods of Stacking	30
	5.7 Protection from the Weather	32
6	DRYING KILNS AND THEIR OPERATION	34
7	HEATING	36
	7.1 Heating Equipment	36
	7.2 Energy Consideration	36
	7.3 Kilns Types	39
	7.4 Convention Compartment Kilns	40
	7.5 Overhead Fan Kilns	41
	7.6 Cross Shaft Design	43
	7.7 Side Fan design	44
	7.8 Comparison between Overhead and Side Fan kilns	47
	7.9 Construction of Kiln Shell.....	48
	7.10 Heat Pump kilns.....	49
	7.11 Kiln Instrumentation	50
8	PRINCIPLES OF KILN OPERATION.....	51
	8.1 Preliminary Procedure	51
	8.2 Warming up	52
	8.3 Maintaining Humidity	52
	8.4 Kiln Record	55
	8.5 Completion of Drying and Cooling	56
	8.6 Kiln Maintenance and Testing.....	57
	8.7 Selection of Kilns	58
9	THE KILN DRYING OF A LOAD OF TIMBER	59
	9.1 Preparation of The Load	59
10.0	CONCLUSION.....	69
11.0	REFERENCES.....	70
12.0	VITA.....	71

ACKNOWLEDGEMENT

Bismillahirrahmanirrahim.....

First of all I am thankful to Allah S.W.T in giving me strength and determination in finishing this final project report.

I would like to thank Mr. Ahmad Fauzi Bin Othman, my advisor and also my tutorial lecturer, thanks a lot on your guidance, help advice, support and criticism in helping me and to complete this final project. To Mr. Wan Mohd Nazri Bin Wan Abdul Rahman as a Head Program of Diploma in Wood Industry and also to al the lecturers who give me support and guidance in preparing this final project report.

A thousand of thank and gratitude to my beloved parent, brother for their support and I would also like thank to all my classmate, junior and friends, who given me support and advice in helping me to compete this final project. **Thanks a lot**

TIMBER DRYING

BY;

MOHD KHUZAIRI BIN GHAZALI

Abstract

Drying process is an important process in wood Industry sector. In production of sawn timber, mouldings, furniture production, bridge making an order wood product. This industry also contributes to economic development of the country and also as an export wood based industry in this country. This study reviews the status and development in kiln-dry industry in Malaysia.
