

**COMPARISON OF FURNITURE FROM WOOD AND NON WOOD
(RATTAN AND BAMBOO)**

By

Siti Sarah Binti Mohd Ariffin

**Final Project Paper Submitted in partial Fulfillment for the Diploma in Wood
Industry, Faculty of Applied Science,
Universiti Teknologi MARA.**

October 2007

ACKNOWLEDGEMENTS

Alhamdulillah , a precious grateful to Allah the almighty for giving me blessing, chance, opportunity, idea, health until I can complete my final project paper, WTE 375 successfully.

My special thanks and appreciations go to my advisor, Madam Norhafizah Binti Rosman for her effort in teaching and guide me from the beginning process of preparing this project paper until finished. She also gave me some advice on how to make a good project paper. At the same time she also provides me some additional information.

My thankfulness also goes to my head project Prof,Madya Dr Jamaludin Bin Kasim for his guidance and effort by giving out useful comment and tips.

Thanks also to my beloved parents for their blessing and moral support. My thankfulness also goes to my entire friend for helping me and always by my side.

Finally, my thank to those who are involve directly or indirectly in completing my project. Thank you so much and may Allah bless you.

ABSTRACT

COMPARISON OF FURNITURE FROM WOOD AND NON WOOD (RATTAN AND BAMBOO)

By

SITI SARAH BINTI MOHD ARIFFIN

OCTOBER 2007

Furniture industry has been developing since the ancient of China, Egypt and Greek. From that year different kind of furniture from variety of material has been produce. But, furniture industry begins with wood as the main raw material. Wood are chosen because of it attractive anatomy appearance and also because of it excellent performance in manufacturing process. Therefore, wood have high commercial value compare to non wood furniture such as rattan and bamboo. Rattan and bamboo select as an alternative material in order to produce variety of furniture in the market also to fulfill current demand. Rattan and bamboo have it own aesthetic and rustic value that bring them align as demanded furniture nowadays. Both material wood and non wood use different method in manufacturing and their export value increase from year to year.
