UiTM DIGITAL LIBRARY KEY PERFORMANCE INDICATORS

PERPUSTAKAAN TUN ABDUL RAZAK
UNIVERSITI TEKNOLOGI MARA

Perpustakaan Tun Abdul Razak (PTAR) UiTM is committed to realizing the aspirations of Universiti Teknologi MARA (UiTM) to continue achieving excellence and enhancing UiTM at the global level.

In supporting the UiTM 2022 - 2025 Digitization Plan, PTAR is ready to play a significant role in realizing UiTM's direction toward a Globally Renowned University in 2025 through UiTM's overall digitalization and ICT initiatives.

For the year 2023, PTAR outlined an initiative that matches the five (5) globally marketable 2023 agenda towards global recognition through the 3 main components of the digital library initiative, namely digital collection, digital services and digital process.

USERWAY

UiTM Library Disability Web Responsive provides several features to help those who need related adaptations to browse the library portal site. This is to comply with the mission of the W3C Web Accessibility Initiative (WAI) to enable the portal site to be navigated by people with disabilities.

DIGITAL LITERACY

Digital literacy is "the ability to effectively and critically navigate, evaluate and create information using a range of digital technologies." The training and assistance that libraries are uniquely positioned to provide help build the skills of the users.

Digital Services

CHAT BOT

Chatbots – automated conversation systems – are available 24/7 and are consistent and patient when answering queries. They remove the requirement to navigate many different sources of information.

eMODULE ARKIB

Offers various courses in the field of archive management that includes matters of principles, concepts, and regulations in the management of UiTM archive, and practice at all levels of creation, use, maintenance, and disposal of records.

ALMETRIC

BIBLIOMETRIC & ALMETRIC

Bibliometric analysis is carried out to analyze UiTM publication patterns in Scopus or Web of Science based on a specific publication period.

Altmetrics is an analysis study using "alternative" measurement, which is based on social media in producing analysis for the performance of publishing scientific articles
