ACKNOWLEDGEMENT

To complete this assignment, it required a lot of guidance and assistance as I faced a lot of difficulty in understanding all the terms and process on how to get the final outcome and it is certainly not done unassisted.

First and foremost, I would like to express my deepest gratitude to the GOD Almighty as with the blessing this project has successfully been done and for giving me strength and patience to complete this assignment.

My deepest appreciation goes to Madam Rainah Ginsad , who gave me this opportunity to conduct this study throughout this whole semester. Without her help, expertise, and persistent help, this research would not have happened. In addition, I would not forget to mention Madam Sumaffiatiee Sulong the examiner for this research for giving me the feedback toward this research.

I also would like to thank to Finance Executive at SESB KENINGAU MR Lennard Molvin Alsson who is always permit me to seek for consultant to my advisor once a month without penalizing me and always understand my effort to complete both my internship and my research paper.

Last but not least, without the willingness of my family and friends to share their knowledge with me, I will probably still not reach the conclusion of this project. Through their support, love and encouragement I am grateful to be able to complete this assignment.
