## **ACKNOWLEDGEMENT**

Firstly, I would like to thank God for His grace, the blessing and strengthen me to complete this Final Year Project Paper within the stipulated time.

A sincere thank to my advisor, Dr. Rozita @ Uji Mohammed for the knowledge and guidance to complete this final year project since the early days. Thank you for the continuous supports supervision and motivations. The great advices and perspective in making correction when we gone wrong and also the encouragement which helps us to come this far.

Secondly, a special thank to Prof. Madya. Dr Imbarine Bujang for teaching us the Research Methodology subject and also to all lecturers of UiTM Sabah. Without their knowledge and guidance, I would not be able to finish this project paper.

Lastly, thank to my family and friend, who always supporting and willing to help me to go through this project paper. Thank you to all that involved direct or indirectly in the completion of this paper and make it to run smoothly. My research would not been possible without them.

## **ABSTRACT**

This research study examined the impact of currency fluctuation in 2010-2014 on 6 Asian export countries. The main type of data used in this study is secondary, sources from the World Bank, Bluenomics and TradingEconomic. The main objective of this study is to investigate the currency fluctuation effect such real exchange rate, interest rate and money supply effect the exports value, which also analyze the changes of goods exports trends due to the depreciation of currency which will answer the question whether currency fluctuation lead to improve the value of export or not. Fixed effect, Random effect and pooled OLS has been applied on panel data to find the impact of currency fluctuation effect the exports value. The result of the study shows that independent variable of real exchange rate (RER), lending interest rate (LIR) and money supply (MS) are significantly affect the dependent variable, value of export. But, real exchange rates and money supply are the strongest variables that affect the value of export since it have the most significant value at 99% confidence level.

Keywords: Exchange rate, interest rate, money supply, fixed effect, random effect, pooled OLS
