## **ABSTRACT**

Numerous studies has been conducted by many researchers regarding to the stock returns (SR), market size (MS) and financial leverage (FLE) but only few who has combined these variables to verify whether these variables are inter-connected between each other. Due to the less number of studies conducted regarding this matter, the current study seeks to explain and thus investigates the effect of financial leverage and market size of selected stocks on stock returns. Ordinary Least Square (OLS) regression methods will be used to model the relationship between the dependent variable and the independent variables. Along the line of the aim of this study to prove whether those variable MS and FLE are directly interrelated with SR this study used all companies listed on the consumer product sector under Bursa Malaysia for five (5) years period starting 2011 until 2015. The secondary data are collected by using an appropriate data stream and from the annual financial reports covering the five years period. General results shows that individually market size and financial leverage did have impact on stock returns.

## **ACKNOWLEDEMENTS**

Alhamdulillah, all praise to Allah s.w.t for all his blessings and hidayah that I can complete my study with all peace and calm.

I take this opportunity to express my profound gratitude and deep regard to my advisor Miss Dg Ku Habibah Binti Ag Kee, Coordinator of Accountancy Faculty for her exemplary guidance, monitoring and constant encouragement throughout the course of this study. The blessing, help and guidance given by her in time to time shall carry me a long way in the journey of life on which I am about to embark.

I also want to take this opportunity to express a deep sense of gratitude to all Bachelor of Finance especially Associate Professor Dr. Imbarine Bujang who has given guidance and brief understanding, coordinal support and valuable information before I start my journey in completing this thesis.

I am also grateful for having infinite support from my family members especially my beloved mom who never missed to give me eternal support and encouraged me to finish my study to the degree level. Not to forget all of my close friends and classmates for all the guidance, information and endless support to the extent that I think I did not deserves it. All of your cooperation is appreciated.

Thank You
