ACKNOWLEDGEMENT

This final year project has been successfully completed with the assistance of various authorities. Hence, I would like to take this opportunity to express my gratitude towards the related parties who have provided guidance and comments along the process of completing this research project.

Firstly, thank you to our supervisor, Mr Marius Benedict for providing his guidance, suggestion, advice, constructive comment and commitment to reply the team's queries promptly throughout this final year project. Mr Marius has always been ready to guide, support and sacrifice his valuable time for us when his assistance is needed by the team.

Besides that, I would also like to extend acknowledgement towards the UITM lecturers, coordinator and tutors who have guided the team with new insights, knowledge and ideas directly or indirectly on the process of completing this project. Moreover, thanks over the moral support, understanding and endless love which were given unconditionally from the families.

Lastly, the cooperation and support received from all members of this research who has contributed to this final year project as their efforts are crucial for the accomplishment of this project. The ideas, suggestions, motivations and inspirations from the all members have greatly contributed to the enhancement of this research project..

ABSTRACT

This study explores the interaction between conventional bond toward some key elements in macroeconomic variable which is interest rate, inflation, gross domestic product, openness of economy and money supply for the case in Malaysia. The purpose of this research is to study on the performance of conventional bond in Malaysia from 2007 Q1 to 2014 Q4. Apart from that, this study wants to know about the performance of bond in Malaysia is a very sensitive or not toward the changes in the macroeconomic variables that have been chosen. This research has employed multiple Ordinary Least Square (OLS) regression model to study on the performance of conventional bond and economic variables in Malaysia.

Keywords: bond, interest rate, gross domestic product, inflation, money supply.
