

WHAT IS ALUMNI?

A person who has completed their education at a certain institution, such as high school or university, is known as an alumnus. Alumni is the plural form of the word "alumnus." This distinction is sometimes carried over from Latin into English, where it is used to refer to a female graduate as an alumna rather than alumnus. In Latin, the word alumnus refers only to male graduates. Alumnae is the correct plural form of the word "alumna." Despite this, the terms "alumnus" and "alumni" are typically utilized in a manner that is gender neutral.

As a graduate, you become a member of your university's student alumni association. An alumni group pulls up former students to stay connected with their university and fellow graduates. Being a member of an association can open up opportunities for you and provide you with several benefits. It not only helps you to stay engaged, but it also allows you to assist new and prospective students.

University alumni may make strong contributions to the welfare of their alma mater. One of the most important ways they contribute is through financial donations. However, another important contribution is through their participation in various university functions. Involvement in events held specifically for alumni may help breed strong esprit de corps among this group. Such types of involvement are considered the very backbone of higher learning institutions. Alumni are also able to play a very important role in support of their institution through serving as a strong source of positive word of mouth publicity. Therefore, higher education institutions must always be concerned that they effectively market to their alumni in order to foster healthy relationships between graduates and their alma mater.
