## 1.0 Introduction

Industrial training is one of the courses that provide students for doing a practical training within the timeframe given. The timeframe for undergoing internship is 5 month which is 20 weeks. The industrial training is a compulsory course for final year student before graduation. During industrial training, students can gain knowledge and experience and at the same time student can apply the knowledge that they had learn during their studies.

Objective of the industrial training are to provide pre-professional work experience with specific assignments and responsibilities, to encourage or stimulate a personal career interest and serving as a bridge between university and the world of work. Other than that, the industrial training helps students to improve their marketability after graduation and to encourage students to apply the skills and knowledge gained at the university to benefit the organization. Besides that, industrial training helps students to adapt managerial and technical skills in a library and information environment.

Perpustakaan Tun Abdul Razak (PTAR) Samarahan, Sarawak Campus is a place that I choose for my internship. I started my internship from 2<sup>nd</sup> February 2015 until 30<sup>th</sup> June 2015. During my internship period, I had been asked to do my practical at two different places which are PTAR Samarahan campus 1 and PTAR Samarahan Campus 2. My friend from Faculty Information Management Program Resource Center who is the one that goes to the same place with me doing her internship.
