A Message from the Rector

Dear Researchers and Colleagues,

I am delighted to express my heartfelt support for the launch of **RMU4U**, a research bulletin devoted to highlighting the remarkable research endeavors of our esteemed faculty members at UiTM Kedah Branch.

Research serves as the cornerstone of an academic institution, fueling vital advancements in knowledge, contributing to societal progress, and propelling our institution towards international recognition. By disseminating research findings and fostering a collaborative research culture, **RMU4U** plays a pivotal role in achieving these goals.

This platform embodies our commitment to promoting a vibrant research ecosystem within our campus community. The insightful articles featured here not only showcase the diverse expertise and research interests of our members but also provide valuable insights into current research trends and inspire further exploration.

I am certain that RMU4U will serve as a catalyst for intellectual dialogue and knowledge exchange, fostering interdisciplinary collaborations and contributing to the overall research excellence of UiTM Kedah Branch. I commend the dedication of our campus members and researchers who contribute to the advancement of knowledge through their commitment and support. Please, continue to utilize this platform actively, share your research endeavors, and inspire your fellow researchers with your dedication and scholarly pursuits.

Let us create a vibrant research landscape together, propelling UiTM Kedah Branch to the forefront of academic excellence and contributing to a brighter future for our society through impactful research.

Sincerely,

Professor Dr Roshima Haji Said
Rector
UiTM Kedah Branch

A Message from the Chief Editor

Dear Colleagues,

On behalf of the editorial team, I am delighted to introduce the inaugural issue of RMU4U, a research bulletin dedicated to showcasing the outstanding research activities, achievements, and publications of our esteemed faculty members at UiTM Kedah Branch.

RMU4U is a platform designed to foster a vibrant research culture within our campus community. We believe that sharing research endeavors and celebrating successes is essential for inspiring innovation, collaboration, and the pursuit of knowledge.

In this inaugural issue, we are honored to feature a collection of insightful articles that highlight the diverse research interests and expertise of our campus. These articles delve into a wide range of topics, from groundbreaking advancements in science and technology to impactful contributions in social sciences and humanities.

We are committed to ensuring that RMU4U remains a valuable resource for our campus members. We encourage you to submit your research manuscripts, articles on research methodologies, and reports on research activities and achievements. Your contributions will enrich the content of the bulletin and serve as an inspiration to your colleagues.

To facilitate an efficient publication process, RMU4U will be issued twice in January and July We have also implemented an online submission platform to streamline the process and make it easier for you to share your work with us.

As we embark on this exciting journey, we warmly invite you to join us in making RMU4U a cornerstone of our research community. Together, we can foster a culture of excellence and innovation that will propel UiTM Kedah Branch to new heights of academic achievement.

Thank you for your solid commitment to research and your dedication to advancing knowledge. We look forward to receiving your contributions and sharing your research accomplishments with our readers.

Sincerely,
Dr Azyyati Anuar
Chief Editor
RMU4U UiTM Kedah Branch

DESIGN GENESIS: **UNVEILING THE FUNCTION COMPLEX**

Normaziana Hassan
College of Creative Arts,
Universiti Teknologi MARA Cawangan Kedah, Kampus Sungai Petani, Kedah, Malaysia

Every man is a designer on their own. Almost everything we do is designed because it is the foundation of all human endeavour. The design process is the organizing and structuring of any action towards a desired, predictable goal. The fundamental importance of design as the main underlying matrix of life is undermined by any attempt to isolate it from other things and make it a thing unto itself. Writing music lyrics, creating a mural, creating an epic pantun, or painting a masterpiece are all examples of design. However, design also includes things like choosing your daily wear from your wardrobe compartment, extracting an impacted tooth, creating layers of a kuih lapis masterpiece, selecting teams for a backyard football game, and instructing a young child. The deliberate attempt to impose a meaningful order is called design.

Essentially, design is about making things better. It just comes down to improving the situation. Doing is another aspect of design. Not that it matters, but designing something is so much simpler when you can see, feel, taste, smell, hear, and actually perform it. When it is real, it works better. Whatever the truth may be, planning is not as effective as prototyping and implementation. This is because unforeseen events are impossible to plan for. Furthermore, life is genuinely unpredictable. It turns out that my previous belief about the role of design was that it was to make everything beautiful. Strategy and design intent are far more closely related than aesthetics. The deliberate process of designing something while taking into account its goal (purpose), functionality, economy, social aspects, AND aesthetics is known as design.

When done correctly, design is always deliberate. Sometimes it is beautiful, and sometimes it is ugly (deliberately).

Design ought to have a purpose. Visual appeal is only one aspect of good design. A truly good design has significance and purpose in addition to drawing our attention. The ideal balance between functionality and beauty is achieved through purpose-driven design. It conveys the required message simply and efficiently in addition to having a nice appearance.

The function complex, on the other hand, is not a widely recognized term in design or engineering but can be understood in the context of design as a concept related to the intricate relationship between form and function. In design, the function complex implies that the functionality of an object or system is closely interconnected with its form or appearance.

This concept suggests that an object's design, including its shape, size, materials, and overall aesthetics, is influenced by its intended function. The form of an object should support and enhance its function.

This means that designers should consider not only how something looks but also how it works and how users interact with it. Balancing the function complex is crucial in creating well-designed and user-friendly products, spaces, or systems.

In essence, design involves understanding the function complex and striving to create harmonious and effective solutions where both form and function are considered in tandem, resulting in a successful and purposeful design.

Author
Normaziana Hassan is a writer deeply committed to exploring the art and design ideas in Malaysia. She holds a Master's degree in Art & Design (Design Technology) from Universiti Teknologi MARA and has a profound interest in fashion design and textile design studies. Normaziana has authored several publications, shedding light on the fashion design areas. Currently, she works as an academician and loves to view Malaysia's cultural diversity and the uniqueness of design ideas.
