ABSTRACT

Industrial Training is a compulsory subject which student has to finish within the period of time frame defined by the university as a way to complete Diploma in Information Management. This report includes a brief summary of my experience and activities undergoing during the physical industrial training at Anson Bay Medical Centre located in Teluk Intan district, Perak for 8 weeks. This reports also aim to strength the reason of why industrial training is compulsory for students as this could give varioud advantages for them before they begin their working career. Industrial training also helps students to clear their path and see themselves in the future by working in the fields that they have been study.
