## ACKNOWLEDGEMENTS

I would like to express my sincere thanks and gratitude to all those people who have contributed invaluable comments in completing this project paper.

Special gratitude to the most instrumental person, Mr. Senian Malie who inspire and provided me essential guidance and precious remark in completing this paper despite his endless commitment and tight schedule.

I would like to express my appreciation to a number of key people and organizations who generously gave of their time and support in the course of this research.

I would like to thank all my lecturers who had delivered their very best in making my study an achievement.

I'm grateful to all those who set aside time from their busy schedules to participate in interviews and to provide information relevant to The Perception of Farmers towards Government Projects: The Case of Samarahan Integrated Agricultural Development Project (SIADP).

In particular I would also like to thank individually SIADP Project Director, Tuan Hj. Md. Saat B. Kasan, who supported the research both intellectually and logistically. To include also the SIADP field staffs who assisted me in distributing the questionnaires.

In this context I would like to thank specifically community members, traditional and administrative authorities within the Samarahan area, the local government department in Samarahan Division as well as individuals that directly or indirectly contributed in different ways and at different stages of the research.

Last but not least, special thanks are also due to all my colleagues wherever they are. Thank you for your countless hours of laughter and joy that we shared throughout the years and thank you for making this BBA program an enjoyment and fascinating one.

## ABSTRACT

Poor participation among rural farmers to inculcate further in their production makes the SIADP has overcome their several issues and problems that arise in managing their effort to get people involves in the given projects.

The adoption of The **Participatory Rural Appraisal (PRA)** approaches and methods that emphasize local knowledge and enable as well as empower local people to make their own appraisal, analysis, and plans.

Researcher only manages to secure 93 respondents out of the targeted sample size of 331 against the total of 2,500 sampling frame, the household head that have been receiving various forms of projects from SIADP, channeled projects to upgrading their socio-economic.

Present the result of a survey on The Perception of Farmers towards Government Projects: The Case of Samarahan Integrated Agricultural Development Project (SIADP) through the usage of PRA criteria by ranking and score the project proposals. Such criteria like the technical consistency of the project, the economic and financial soundness of the project, the expected benefits of the project, the implementation capacity of the project management committee, the participation and/ or contribution of the beneficiaries and, the sustainability of the project.

Majority of the respondents ranked and scored for high perception toward the projects proposal and it was found that there's the need to continuously adopting the PRA approach in SIADP.

## **CHAPTER ONE**

### **1.0 INTRODUCTION**

#### **1.1 BACKGROUND TO THE RESEARCH**

“Integrated Agricultural Development Project (IADP)” is the main component under the **rural** integrated development program which is under the Ministry of Agriculture and Agro Base Industry of Malaysia.

It was introduced for the first time in the year 1965 in Malaysia and was extended in Sarawak in year 1986 which is known as Samarahan IADP (SIADP).

The selection of Samarahan River Basin were based on the high poverty rate, low in agricultural production, less infrastructure facilities, and the agricultural development potential of the area. See Appendix 1 for detailed map of the projects area.

The in-situ program carried out by SIADP involves providing developments and implementation packages mainly to upgrade the socio-economic level and to assist traditional or **rural farmers**. (Noweg, Songan, Abdullah, Jihen, 2004. pp: 1)
