ACKNOWLEDGEMENT

Gratitude and praise be to Allah for His blessings and guidance throughout this research journey. I am truly grateful for the completion of this study within the given timeframe. I extend my heartfelt appreciation to my supervisor, PN. Nazatul Azleen Zainal Abidin, for her invaluable guidance and unwavering support, which played a pivotal role in the successful completion of this research.

I am also deeply grateful to my beloved parents for their constant support and encouragement throughout these years. Their unwavering love and encouragement have been my pillar of strength, even during challenging times.

Lastly, I would like to express my gratitude to all my friends, whose presence and support have been a source of comfort and motivation during difficult moments. Their assistance and encouragement helped me overcome the obstacles faced during this journey.

ABSTRACT

This project focuses on the development of an E-learning arabic courseware (EZ-Arabic) for primary school. The courseware aims to reading and learning for Arabic Year 6. The main objective is to address the current challenges in reading and provide an engaging learning experience for students and teachers. The project follows the ADDIE model to ensure effective courseware development and usability for all users. Courseware is designed to be accessible to students, teachers, facilitating interactive learning and supporting students' reading and learning. Moreover, the incorporation of Universal Design for Learning (UDL) theory principles further enhances the courseware's impact on learning outcomes. The thorough evaluation of the courseware's functionality and usability ensures a seamless learning experience for both students and teachers. Overall, the courseware's success highlights its pivotal role in fostering early literacy skills and creating an E-learning arabic courseware (EZ-Arabic) For primary sch
