ACKNOWLEDGEMENT

With the name of Allah S.W.T, I felt grateful because of HIS Blessing and Strength, I have completed this final project paper (WTE 375).

I would like to give my sincere thanks to the following person who give me the knowledge and co-opeartion during my research such as my beloved advisor Mr. Amran bin Shafie, Assc. Prof Dr.Jmaludin Bin Kasim, Mr. Wan Mohd Nazri Bin Wan Abdul Rahman and last but not least Mr. Sardey.

Finally, to all friends in Diploma in Wood Industry, thank you for your spirit and encouragements.

Thank you.....

ABSTRACT

The research was done to identify the effects of recycling paper properties based on the differences level of revolution and the differences consistency. The recycling paper that used was drawing paper. Commonly, the volume of tensile index will increase while the others will decrease.
