ACKNOWLEDGEMENT

Completing this research was a challenging project for us. However, fortunately we had the help of many parties that made this project less difficult. The public or people at central of Malacca had helped us in our research. We thank them from the bottom of our hearts for being there in our moment of need.

Our supervisor, Tuan Hj Abdul Hameed b. Mohamad Mydin deserves a special mention here. He was insistent on the meetings and deadlines which we did not quite appreciate then. But looking back, his toughness made us work harder and for that we will always be grateful.

I would like to thank our lecturer who taught us many things about research but did not tell us that it would be this difficult. We learn a valuable lesson about research in action. Things do not go as expected or planned. You have to make adjustment but these are justified or qualified.

We would like to thank God Almighty without whose blessing we will not have successfully completed this study.

Abstract

Child abuse is a serious problem. Nowadays, Malaysia is faced with this critical problem. Everyday we hear new cases that included children such as kidnapping, rapes, murder and violence. The main purpose of this study is to find what factors lead to an increment of child abuse in Central Malacca. A random sample of 100 people in central Malacca was used. The findings showed several factors that lead to increment in child abuse cases.
