AKNOWLEDGEMENT

I am grateful to Allah S.W.T for giving me good health, opportunity to embark on my bachelor's degree and completing this project paper.

I am using this opportunity to express my gratitude to everyone who supported me throughout my journey in completing this final project paper. I am thankful for their aspiring guidance, invaluable constructive criticism and friendly advice in completing this paper.

My appreciation goes to my institute, Universiti Teknologi Mara (UiTM) for giving us the opportunity to conduct this research study. I found myself satisfied with all the valuable skills and knowledge learned throughout the process.

Finally, I would like to give appreciation to our advisor, Madam Emelia A. Girau for her friendly and gentle guidance to us. I also thank to my parents for continuous support, encouragement and attention. This piece of victory is dedicated to both of you.

ABSTRACT

This paper objective is to examine the relationship between future price and spot price of selected agriculture products in India. The result found that there is positive significant relationship between both variables based on pooled ordinary least square regression method. The sample of this paper consist of monthly data which is taken for 5 years from 2014 to 2018 from Multi Commodity Exchange and National Commodity and Derivatives Exchange of India (NCDEX). The selected agriculture commodities are soybean, sugar and wheat.
