## **ACKNOWLEDGEMENT**

Alhamdulillah, a grateful thanks to Allah SWT, who give courage, inspiration and strength for me to complete the project paper and the study. At last, after going through tough challenges, with strong support and guidance of several individuals, I manage to complete this project paper accordingly.

I would like to take this opportunity to express my acknowledgement to my advisor, Tuan Haji Shariff Haniff for his professional guidance in preparing, analyzing and finalizing this study. I would like to thank him especially for his effort, time and valuable opinions.

I also like to wish my sincere thanks to Mrs. Florence Tan, manager of Employee Relation Department and Mr. Nadzri Mursidi, manager of Training Department at Aiwa Electronics Malaysia (AEM) Sdn. Bhd for being my internal supervisor for this study. Valuable guidance, information and cooperation from both of them are very much appreciated in completing this study.

My appreciation to all BBA(Marketing) Hons lecturers of Universiti Technology Mara Melaka Campus in providing me information and support in completing my study. The appreciation also forward to all my classmates that work together in these 2 years study.

Last but not least, my special thanks to my beloved family for their strong moral support and aspiration during my difficult times. Not forgotten to my housemates and friends. Without them I would not come this far in pursuing my studies. Thank you for all for being there for me.

Thank you, waalaikumsalam.

## **ABSTRACTS**

In the world today environment protection is one of the main issue that played in the people mind. Everyday environment issue such as open burning, recycling, forest destruction and so on viewed in the TV news and newspaper.

Now, the issue had come to Malaysia where the government try to educate people to protect the environment. As a prove the launch of recycle campaign, “Think before throw”. Recycling reduces the need for landfills or dumpsites. Should rubbish double along with the population in Malaysia, we may very soon be sharing our homes with dumpsites. Imagine not having to take the rubbish out anymore.

Therefore the writer take this opportunity to do a research in this aspect where the implementation of ISO14001 that also known as Environmental Management System (EMS) at Aiwa Electronic Malaysia (AEM) Sdn. Bhd as the a model.

It cannot be a doubt that ISO14001 implementation has a link with the protection of environment, thus the action of AEM employees that educated by EMS at the workplace is measured. The writer hope that the implementation of ISO14001 activities that relate to environment protection can be brought outside the workplace. Therefore it can increase the level of awareness in protecting environment not only to AEM family but the whole community.

To make this succeed, the level of training and education towards protecting environment is a vital step. Therefore this study also focus to this aspect to make sure this dream come true. Finally let us make this dream come true by joining hands together before this world reach its time and cannot handle the pollution anymore.
