

INDUSTRIAL TRAINING REPORT

1st March 2024 - 9th August 2024

MIGHT PARTNERSHIP

NAME:
ALEEF MIRZA BIN NORIZAM

STUDENT ID:
2021843328

PROGRAM:
BACHELOR OF BUSINESS
ADMINISTRATION (Hons) HUMAN
RESOURCE MANAGEMENT

executive SUMMARY

Completely finished my internship at MiGHT was an honoured to be a part of the organisation for 6 months (24 weeks). I value every minute and consider it to be of utmost importance because the experiences I have gained will help me land a better job after graduation. This report will include every assignment and task I have finished.

I was placed in Human Resources Unit under the Corporate Affairs and Strategy Division (CASD) which greatly increase my knowledge and proficiency in human resources skills. My job scope and assigned tasks helped me to gain a deeper understanding of human resource management. My own positive internship experience has been facilitated by the presence of friendly coworkers and a supervisor who is both understanding and helpful.

From my perspective, MiGHT is not a company that specializes in human resources. Assisting Malaysia in achieving greater technological proficiency and capability was the primary objective of MiGHT. Apart from my academic background, I have learned novel knowledge about advanced technology in rail transportation, shipbuilding and ship repair, green management, and aerospace.

MONDAY – FRIDAY
9:00am – 6:00pm

Background Of MIGHT

The focus Malaysia has long placed on the advancement of science and technology is not new. Utilizing science and technology, the government has long taken proactive steps to advance and grow techno-business opportunities. Under the leadership of Prime Minister Dr. Mahathir Mohamad at the time, the Prime Minister's Department established the position of Science Advisor in 1984 in an effort to foster an environment that would support the advancement of science, technology, and its application. The action is perceived as a supplementary measure that offers an alternative viewpoint to those of the concerned Ministries. The Prime Minister's Science Advisor was Dr. Omar Abdul Rahman, who served in that capacity until his retirement in 2001.
