EXECUTIVE SUMMARY

This internship report summarize the insights and experiences gained during my time as an intern at Paramit Malaysia Sdn. Bhd., where I was positioned in the Finance department. The primary objective of this internship was to apply theoretical knowledge in a real-world business environment, develop professional skills, and contribute meaningfully to the organization's goals. In a six months, I was actively involved in various projects and tasks. Key responsibilities included account payable, supplier interaction and month end report. These tasks not only allowed me to apply my academic knowledge but also provided a comprehensive understanding of the industry's standards and practices. Additionally, I was given the opportunity to attend various training sessions and workshops that were helpful in enhancing my technical and soft skills. These sessions covered a range of topics from advanced Excel techniques. The knowledge gained from these sessions was directly applicable to my daily tasks and significantly improved my efficiency and effectiveness. Throughout the internship, I received continuous support and mentorship from my supervisor and colleagues, which was useful for my experienced development. Their guidance helped me navigate challenges, understand organizational dynamics, and achieve my internship goals. In conclusion, this internship was a transformative experience that bridged the gap between academic learning and professional application. It equipped me with practical skills, industry knowledge, and professional confidence, thereby laying a solid base for my future career.

COMPANY'S PROFILE

BACKGROUND

Picture 1.0

Founded in 1990, Paramit Corporation is a product development and manufacturing firm with locations in California and Malaysia. The company offers comprehensive engineering, manufacturing, and post-manufacturing services specifically for medical device and instrument companies. As an FDA-registered manufacturer of finished medical devices, Paramit is adept at producing FDA-compliant products with stringent process controls and advanced information management and reporting systems.

Headquartered near Silicon Valley and acquired by the Swiss-based Tecan Group in 2021, Paramit aims to enhance global healthcare innovation. The company is expanding its presence in Asia with a new facility in Penang, Malaysia, dubbed the “Factory in the Forest.” With a workforce of 842 employees, Paramit's Malaysian operations are growing in sophistication and focus, solidifying its global footprint as a leading U.S.-based contract manufacturer of complex medical devices and life science instruments.

Paramit Malaysia Sdn Bhd, situated at Plot 372, Penang Science Park, Lorong Perindustrian Bukit Minyak 21, Taman Perindustrian Bukit Minyak, 14100 Simpang Ampat, Penang, has been an influential player in the manufacturing sector since 2011. Originally covering 82,000 square feet and employing 500 people, the facility specialized in producing complex security technologies, including fire and gas detection systems, digital level measurement, automotive heating, and farm information management solutions. Utilizing its established engineering expertise and ISO 9001 and ISO 13485 certifications, Paramit Malaysia has smoothly transitioned into manufacturing medical devices and life sciences instrumentation.
