## RECIPIENT OF THE PRESIDENT'S AWARD - BOARD OF ENGINEERS MALAYSIA (BEM)

Norzahrin Abd Majid is a passionate and determined PhD candidate currently pursuing his doctoral studies through the fast-track program, having achieved an outstanding CGPA of 3.92 during his undergraduate journey. For Zahrin, the title "engineer" is more than just a profession — it's a meaningful commitment to serve society, whether through construction, design, or academia. As long as one contributes positively and professionally, Zahrin believes they embody the true spirit of engineering.

Driven by a strong desire to complete his PhD on time and contribute to the engineering field, Zahrin acknowledges that the path is far from easy. Yet, the unwavering support from his family, lecturers, and supervisors has been his pillar of strength, empowering him to persevere.

"Never give up. Always seek advice from your seniors and lecturers — they've walked the path and are always ready to help."

Zahrin reflects on his personal growth since beginning his postgraduate journey — he now considers himself a more disciplined and productive individual, with improved time management skills compared to his undergraduate days. These traits, he believes, are crucial not only for academic success but also for professional excellence.

He draws deep inspiration from his role models: Ir. Salmizi bin Ja'afar, his lecturer for Integrated Design Project, and Ts. Dr. Yazmin Sahol Hamid, who is always approachable and generous with her guidance. Their dedication to teaching, research, and industry engagement has inspired Zahrin to follow a similar path — becoming a lecturer who not only teaches but also contributes meaningfully to the advancement of engineering knowledge.
