

UNIVERSITI TEKNOLOGI MARA

**MECHANICS OF SINKHOLE DUE TO
GROUND TREMOR**

MOHD FIRDAUS BIN MOHD AKHBAR

Thesis submitted in fulfillment
of the requirements for the degree of
Master of Science

Faculty of Civil Engineering

November 2014

AUTHOR'S DECLARATION

I declare that the work in this thesis was carried out in accordance with the regulations of Universiti Teknologi MARA. It is original and is the results of my own work, unless otherwise indicated or acknowledged as referenced work. This thesis has not been submitted to any other academic institution or non-academic institution for any degree or qualification.

I, hereby, acknowledge that I have been supplied with the Academic Rules and Regulations for Post Graduate, Universiti Teknologi MARA, regulating the conduct of my study and research.

Name of Student	:	Mohd Firdaus Bin Mohd Akhbar
Student I.D. No.	:	2009967143
Programme	:	Master of Science (Geotechnical Engineering)
Faculty	:	Civil Engineering
Thesis Title	:	Mechanics of Sinkhole Due To Ground Tremor
Signature of Student	:	
Date	:	November 2014

ACKNOWLEDGEMENT

In the name of ALLAH S.W.T, the Most Compassionate and Most Merciful and prays be upon the prophet Muhammad S.A.W.

In the process of completing this research report, I am beholden with the assistance, guidance and support of many people that rebounded in dissimilar ways to the preparation of this thesis.

I would like to lengthen my sincere gratitude to my respectful supervisor, Prof. Ir. Dr. Zainab bt. Mohamed, for her support, guidance, helpful advice and encouragement. Not to forget, a special appreciation to Mr. Anuar b. Hashim from Minerals and Geoscience Department, Malaysia and Mr. Hasnol b. Ariffin from SIRIM, Malaysia for willingness to assist me throughout completing my research.

Besides that, I would like to thank to Rock Mechanics and Advanced Soil Mechanics laboratory technicians in Faculty of Civil Engineering, UiTM Shah Alam, Mr. Muhammad Azhar b. Abdul Razak and Mr. Muhammad Fuad b. Ahmad for helping me in preparation of my sinkhole physical model and conducting engineering testing on remolded limestone residual soil.

Finally, I would like to thank my beloved parents, Mohd Akhbar b. Yahaya and Che Roslee bt. Idris for being there for me when I needed them most. May Allah bless all of your kindness and may success will light up your life in the future.
Thank you.

TABLE OF CONTENTS

	Page
AUTHOR'S DECLARATION	ii
ABSTRACT	iii
ACKNOWLEDGEMENT	iv
TABLE OF CONTENTS	v
LIST OF TABLES	vii
LIST OF FIGURES	x
LIST OF SYMBOLS	xv
CHAPTER ONE: INTRODUCTION	1
1.1 Background of Research	1
1.2 Problem Statement	5
1.3 Objective of Research	6
1.4 Significance of Research	6
1.5 Scope and Limitation	7
1.6 Thesis Outline	7
CHAPTER TWO: LITERATURE REVIEW	9
2.1 Nature of Sinkholes Formation	9
2.2 Bedrock Formation Beneath Sinkhole	11
2.3 Triggering Factor to Sinkholes Formation	13
2.4 Sinkholes Incidences in Malaysia	16
2.5 Geoelectrical Resistivity Survey	24
2.6 Earthquake Induced Sinkhole Incidences	35
2.7 Relationship of Shear Modulus to Sinkhole Formation	37
2.8 Laboratory Studies on Soil Failure due to Vibration	39
2.9 Gap of Knowledge	42

CHAPTER THREE: RESEARCH METHODOLOGY	43
3.1 Introduction	43
3.2 Desk Study	44
3.3 Field Work	45
3.4 Laboratory Work	53
3.5 Physical Model Study	58
CHAPTER FOUR: RESULT AND DISCUSSION	65
4.1 Introduction	65
4.2 Site Geology	65
4.3 Subsurface Investigation Report	69
4.4 Geoelectrical Resistivity In-situ Result	81
4.5 Comparison of Physical Properties of Limestone Residual Soil	124
4.6 Mechanical Properties of Limestone Residual Soil	130
4.7 Sinkhole Model Subjected to Vibration Test	144
CHAPTER FIVE: CONCLUSION AND RECOMMENDATIONS	158
5.1 The Characteristic of Limestone Residual Soil That Vulnerable to Sinkhole Incidence	158
5.2 The Relationship of Geoelectrical Resistivity Index, Physical and Engineering Properties of Limestone Residual Soil	160
5.3 The Effect of Percentage of Fines to Changes in Shear Modulus and Sinkhole Formation Subjected to Ground Tremor	161
5.4 Recommendations	162
REFERENCES	164
APPENDICES	172
