Elemen Asasi “ILMU” Dalam Tamadun Barat

Oleh Abdul Manap Mahmud

“Tujuan Ilmu adalah mencari
kebenaran yang asli “
Plato (427-348 SM)

“Dasar Ilmu adalah penyelidikan
tentang Tuhan, alam, dan manusia”
Descartes (1590-1650M)

“Ilmu meliputi perkara metafizik,
logik, retorik, etika, ekonomi, politik,
dan estetika”
Aristoteles (382-322 SM)

“Ilmu adalah tentang alam dan
hakikatnya “
Alfarabi (870-950M)

ILmu mencakup dalam empat
persoalan : (1)Apakah yang kita
ketahui (metafizik); (2) Apakah yang
seharusnya kita ketahui (etika)?
(etika); (3)Sampai dimanakah
harapan kita (agama)?; (4)Apakah
yang dinamakan manusia
(antropologi)?
Imanuel Kant (1724-1804)

PENGALAMAN PDP-ODL DALAM KALANGAN PELAJAR

Oleh Siti Aminah Mohammad,

ODL (Open and Distance Learning) pastinya memberi cabaran dan pengalaman yang berbeza bagi setiap pelajar mahupun pensyarah. ODL ini dilihat telah mempercepatkan revolusi pengajaran dan pembelajaran (PdP) dan telah memberi ruang yang positif dalam membentuk aras sendiri yang lebih baik seperti menghargai ruang dan masa, berani berubah demi menyesuaikan dengan keadaan dan lebih kuat untuk menghadapi cabaran. Semasa seisi ODL ini berjalan, cabaranya datang daripada pelbagai penjuru; capaian internet yang buruk, tempat belajar yang tidak kondusif, perlu menolong keluarga dalam membuat kerja-kerja rumah antara yang dihadapi oleh pelajar terutamanya pelajar bahagian 1 Diploma Sains (DIS). Namun tanpa disedari, cabaran ini memberi kekuatan kepada pelajar-pelajar dalam meneruskan ODL. Disamping sokongan moral daripada rakan sekelas dan pensyarah. Pensyarah juga sentiasa memastikan pelajar-pelajar selesai sepanjang seisi ODL berlangsung, seperti memberi waktu yang fleksibel dalam PdP.

ODL semester ini akhirnya melabuhkan tirai, dan sebagai pensyarah FSG, segala usaha, kesabaran, ketahanan, ketekunan dan sikap tidak berputus asa pelajar dalam menghadapi ODL adalah merupakan kebanggaan kami.

“segala usaha, kesabaran, ketahanan, ketekunan dan sikap tidak berputus asa pelajar dalam menghadapi ODL adalah merupakan kebanggaan kami...”

Hello ms Sam, act this my first experience with physics online class in my entire life and i never thought I'll have experience on this. At first, I think it must be difficult to have online classes as I am a bit weak in physics subject but apparently this online class is helpful for me because i can watch lecture videos repeatedly until i understand. So thank you ms Sam for this amazing experience :)

← Reply

For Physics class, I really like it because miss always gave us exercise and note with a voice. If we do not understand the topic miss try harder to make us understand. But if face to face maybe it easier to we understand. When odl class start, it feel good at first but actually it more harder because we can't make study group and many assignment must be submit in the short term and at the same time.

← Reply

Sepnjng odl ni, I thought odl would be as simple as many other people think because we can learn comfortably at home beside your family but honestly no. There's a lot of obstacles need to be tackled every single day because we all have 2 roles now; student and child. Nevertheless, physics online honestly run smoothly and I only need to study harder for the chapters I weak at and not to forget miss's quotes always heal my heart, little by little. ODL honestly thought me many things and some of them are to be patient and tawakal 🙏 lastly, I want to thank Miss Sam for teaching us in this sem and hoping to be in your class next sem ✨

Nutrient Level In Upper Stream Of Tuaran River And Its' Health Risk Potential

Student:Nur Insyirah Morini Binti Nasip

Supervisor: Ansir Salim
The Distribution And Abundance Of Meiofauna Between The Sandy And Muddy Sediment Of The Intertidal Zone At Likas Kota Kinabalu

Student:Nur Syahfitriani Binti Podang

Supervisor:Siti Sarayati Abd Mawah
Preliminary Studies On Gastrointestinal Parasite In Wild Rats Of Sapi Island.

Student:Sudyla Philip

Supervisor: Dr. Lo Chor Wai
Isolation And Screening Of Oil-Degrading Bacteria From Oil-Contaminated Soils

Student: Verniun Maidin
Supervisor: Abdul Manap Mahmud

The Potential Of Anti-Arthritis Plant Used By The Dusun Kwijau In Keningau, Sabah As Antioxidant And Anti-Inflammatory Agents

Final Year Project (FYP)

The FYP is a project or academic task that must be accomplished individually by every undergraduate students in order to obtain the attributions to graduate. the FYP also plays a crucial role in the teaching-learning process. It is also a way of identifying the ability of the student to perform applied research linked to the knowledge discipline. So this exercise can be considered as a motivation for the students because it allows them choose methods, tools and make decisions during its development.

Several approaches have been proposed for the classification and assessment of FYPs, but among them rubrics have become a standard for this type of evaluation; due to the different competences that must be evaluated
