

Tinjauan Awal Sesi Pembelajaran Atas Talian dan Jarak Jauh (ODL) Pelajar Fakulti Sains Gunaan: Masalah dan Harapan

Ajis Lepit, PhD
Ketua Pusat Pengajian Fakulti Sains Gunaan
UiTM Sabah

PENDAHULUAN

Fakulti Sains Gunaan (FSG) UiTM Sabah mengucapkan selamat datang dan selamat meneruskan pengajian kepada semua siswa/i untuk Semester Oktober-Januari 2020 ini. Kepada siswa/i baharu, kami turut mengucapkan tahniah, selamat menempuh pengalaman baharu dan selamat maju jaya. Kami turut mendoakan semua siswa-siswi dapat mengadaptasi norma baharu dan dapat menerima persekitaran pembelajaran atas talian dan jarak jauh (*Online and Distance Learning*, ODL) ini sebaik-baiknya.

TINJAUAN

Pihak FSG telah menjalankan satu tinjauan awal sesi pembelajaran atas talian dan jarak jauh (ODL) pelajar FSG UiTM Sabah. Tinjauan ini dijalankan sehari sebelum PnP secara ODL bermula. Ianya bertujuan mengetahui kesediaan siswa/i menghadapi ODL pada semester Oktober-Januari 2021 ini.

RESPON

Hasil tinjauan ini mendapati, 104 orang pelajar (61%) bersedia untuk sesi PnP secara ODL, 60 orang pelajar (35%) berkedudukan tidak pasti dan 7 orang pelajar (4%) menyatakan tidak bersedia. Hasil tinjauan ini turut ditunjukkan dalam beberapa rajah di bawah.

PENUTUP

Semoga tinjauan ini dapat dimanfaatkan untuk tujuan penambahbaikan dan untuk meningkatkan prestasi PnP dalam kalangan pensyarah dan pelajar FSG UiTM Sabah

Pelajar FSG
berkaitan ODL
sepanjang
semester Mac-
Julai 2020**

**Rajah 4:
Maklumbalas
Harapan Pelajar FSG
berkaitan ODL pada
semester Oktober –
Januari 2021**

Meningkatkan HNPG

Meningkatkan penguasaan ODL

Mengharapkan PnP yang menarik dan berkesan

Jadual Masa PnP yang lebih anjal

Capaian internet yang lebih baik

Penilaian yang lebih teratur dan tidak melebihi kemampuan pelajar

*Scientific Scrawls***TO WRITE OR FLIGHT**

**Julenah Ag Nuddin, PhD,
Senior Lecturer**

Should we write or should we flee? But could we? Write? Flee? That would best describe our feelings when placed in such predicament. Walter Cannon, a physiologist from Harvard during the early 1900s had described such behaviour aptly, explaining that a general discharge from the sympathetic nervous system would prepare animals upon facing a stressful situation to fight or run from it. Subsequently, after careful consideration or wicked negotiation, we have successfully FLED. Never that easy, my friend. Writing is a skill that we are supposed to have acquired from the early years of primary education. It is the most basic skill which would enable one to survive in this vicious world. The other skills that need to be gained are reading and arithmetic, the 3Rs of Kindergarten. From those young years, writing is taught in many forms, alphabets, symbols etc. It is used in many functions such as instruction, information, enquiry, expression, guidance and many more. They are also curated in many forms.

Hence, writing is an important skill. It enables us to record our experience, knowledge, and data. Therefore, in the scientific world, writing would disseminate latest findings which may contribute to the advancement of technology and eventually, human civilisation. Thus, to write, one must be prepared. The mental condition is the most important part that should be prioritised. It needs environment, physical, intellectual, and emotional supports. Do start small by making indistinctive activity at a time. I always start with my surrounding. A good spot or desk or room to do your work will make you feel comfortable and unleash the flow of ideas. Some people will prefer a tidy setup but there are those who is lost in their creative juice just as well in their mess. A fit body, a healthy mind. To accomplish satisfying writing, the physical, emotional, and intellectual quotients should be balanced. This would provide you with a clear and conscious mind, capable of applying, analysing, and evaluating thoughts. Eventually, synthesising ideas that are being revealed in your writing. Easier said than done, huh? Of course, there are other factors that will promote your writing #
