Abstract

OffPAC is a smart phone application designed for iOS and Android which function as an OPAC (Online Public Access Catalogue). User may use OffPAC even without an active Internet connection to search within library catalogue. It transforms the traditional ways of searching materials on OPAC that is installed on dedicated computer with an Internet or network connection. OffPAC displays a complete material bibliographic information on user's smartphone screen and makes it easier for any library user to find books in the collection and bookmarked them for later access. It provides easy workflow for library staff and users in order to check whether any book or material is already available or not on library shelves. OffPAC application is further enhanced for asset tracking. When users need to locate any asset, the asset number will indicate the location of the asset in any large stores or storage rooms.

Keyword: Offline public access catalogue, search library catalogue, library smart phone application, online public access catalogue, library mobile app, opac app, offpac app, android, ios

Potential commercialization: The app can be customized not only to be use as an OPAC replacement (for in use at libraries), but also for other documentation centers for examples: files room, archives centers and many others. Files and materials managed by OffPAC can be easily retrieved and located for further use. Can also be use at large shopping mall, warehouses and item storage room for easy information retrieval regarding an item: their whereabouts and detail descriptions.

Acknowledgment: Gold Medal: International Invention & Innovation Competition (ITEX) 2015 (21-23 May 2015)
Gold Medal: International Conference and Exposition on Inventions by Institutions of Higher Learning (PECIPTA) 2015 (4-6 Disember 2015)
Champion (Management Category): 2016 Public Universities ICC Convention. (3-4 Ogos 2016)
