The COVID-19 pandemic, which began in early 2020, has turned most teachers and lecturers' lives into living nightmares. Education is one of many fields that has been severely impacted by the virus in terms of managing and carrying out ones' duties as educators. One of the challenges that the educators face when teaching online classes is preparing lecture materials and catering to various aspects of documentation and technical issues, not to mention maintaining educators' self-confidence and motivation, as well as students' overall well-being. Some

educators have the expertise and knowledge to face such unprecedented phenomenon, the outcome of which no one knows. Whereas some of us may not come from an education background, so, we must learn how to be effective educators. O9LINE KIT 4 LECTURERS has been specifically designed to assist educators in having a perfect course documentation for their Online Distance Learning (ODL) classes. Using this kit may assist the educators to effectively manage the contents of their courses. Currently, such a kit or model is unavailable to aid the educators in dealing with the current

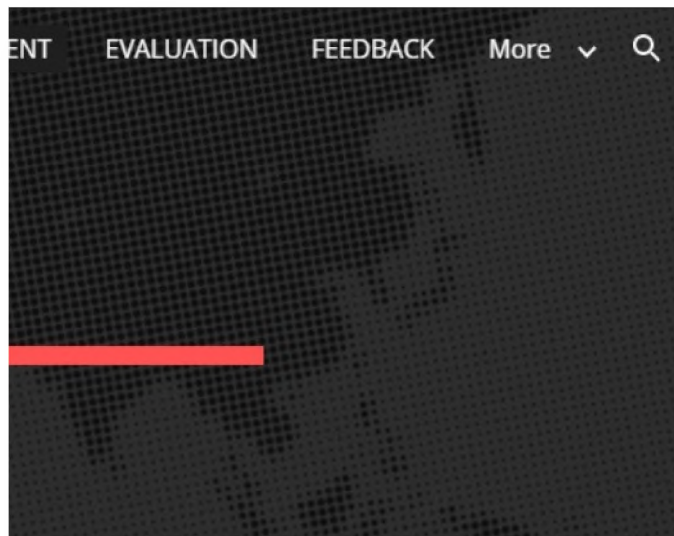

situation, particularly now that they are required to teach entirely online. In the future, we hope to expand the usage of the kit by making the O9LINE KIT 4 LECTURERS more practical and efficient for use across the country. The following are the objectives of the O9LINE KIT 4 LECTURERS:

1. To facilitate educators to layout their lesson materials.
2. To provide various tools educators can choose, which are suitable for their courses.

Our goal is to become a one-stop centre for educators in HEIs and other educational institutions. This kit has been designed to assist the educators in making full use of online-class preparation. The kit contains six (6) items to meet lecturers' needs in conducting the ODL. The first item is Pedagogy, which includes a Pre-survey template, Pedagogy Styles, Research Paper eBook, a checklist, and an e-Book on Understanding Pedagogy. The second section is Technology, which describes the relevant information on the tools that will be used in ODL lessons. The third section is Content, which includes

information on how to outline ODL lessons using our automated outlines, Slide Templates, and an e-Book on how to make pre-recorded and live discussions meaningful and efficient. The fourth page is about Assessment and their templates, which includes automated attendance, quizzes, and peer evaluations. The fifth page is about Evaluation, which includes a template for hands-on, assignments, group projects, and online tests. Finally, the Feedback area contains a post-survey and course evaluation once instructors have completed their ODL sessions and reached the end of the semester. The following is an example of how to use the ODL template. The steps are to first complete the ODL *Google Form*, then click submit, and your automated report, which is the ODL Outline Reporting, will be in your *Google Doc*. With the use of this kit, the instructors will be able to better manage their courses and materials, and it will be easier for them to prepare online learning. This kit is useful for educators from both public and private universities as well as MOE, MOHE, teachers, and IPGs. This comprehensive kit has the potential to be commercialised as a one-stop

ARKS TEMPLATES

centre for online documentation for ODL purposes, as well as a STARTUP KIT for MOHE and MOE educators to conduct ODL lessons. In the future, the developer will find ways to collaborate with relevant educators from IPTAs and IPTSs.
