2. This project paper is the result of my independent work and investigation, except where otherwise stated.
3. All verbatim extracts have been distinguished by quotation marks and sources of my information have been specifically acknowledged.

Signature:_____.

Date:_____.

ACKNOWLEDGEMENT

Alhamdulillah, praise to Allah for giving me the strength and inspiration to complete my project paper as requirement to obtain my Bachelor in Business Administration (Hons) Marketing. At last, after going through tough challenge with strong support and guidance of several individuals, finally I had successfully managed to complete this proposal according to the planned.

First and foremost, I would like to dedicate the special acknowledgement to Mr Rizuwan Bin Abu Karim for the advice, helps, inspiring ideas and incredible guidance in assisting performing this research. Without her guidance, this project paper could not come to this end.

I wish to extent my grateful appreciation to staffs of Daibochi Plastics Sdn Bhd. especially to the Credit Risk Control Department, Mrs Ghazana Said Atan and Miss Azla Shapura for full cooperation in helping me to gather the data and information needed.

My appreciation also goes to respondents who are willingly spent a little bit of their valuable time to take part in the survey. The cooperation had indeed speed up the data collection process. Special credits to all my friends that involved directly or indirectly for this research accomplishment. Last but not least, I would like to thank my family for their moral support.

Thank you.

Abstract

Safety management is commonly understood as applying a set of principles, framework, processes and measures to prevent accidents, injuries and other adverse consequences that may be caused by using a service or a product. It is that function which exists to assist managers in better discharging their responsibilities for operational system design and implementation through either the prediction of system's deficiencies before errors occur or the identification and correction of system's deficiencies by professional analysis of safety occurrences.

The objective of safety management in the packaging industry is to prevent human injury or loss of life, and to avoid damage to the environment and to property. (John Illson, Integrated Safety Management Section). Safety comes at a price. All organizations have limited resources to devote to safety, and must deal continually with the conflicting goals of safety versus productivity, efficiency, or customer service objectives, which ultimately determine profitability.

This study is attempted to discover how Daibochi Plastics take an actions to resolve this circumstance base on the type of safety management that they take as a guidelines to resolve the problem. At the same time this study will explain details about type of safety management and how to prevent it well. In addition it will help the company recognize all this elements as a key success to prevent hazards and teach their employee about knowledge of safety in workplace.
