ACKNOWLEDGEMENTS

“In the name of Allah the most benevolent and the most merciful. All the praises to Allah. God of the Universe and peace be upon His Messenger”.

Alhamdulillah, praise to Allah S.W.T for giving me strength to complete this research from the beginning of the process until the finalization of my research project. Without the assistance, cooperation and guidance of those with the knowledge and experience, I would not make it through.

First and foremost, I wish to express my deepest and sincere appreciation and gratitude are extended to my dedicated and understanding Advisor, Puan Najihah Hanisah binti Marmaya, for her skilful guidance and assistance, understanding and commitment throughout the duration of this work. Her encouragement, understanding, suggestion s, support and her skilful guidance, valuable comments, supervision, time, advice have been instrumental guidance in finalizing this report and criticisms were helpful and essentials in completing this project.

My special thanks also goes to all staff of Perbadanan Putrajaya because of the time that they spared in completing my questionnaires and also I want to acknowledge my supervisor, Puan Siti Fadilah binti Ramli as Assistant Director of Human Resource Management Information System, who has giving me the opportunity to learn lots of new things.

My gratitude also to all lectures in UiTM Kampus Bandaraya Melaka for their contributions during my studies and also thanks to my friends and colleagues who have directly or indirectly involves in this project, for their tireless encouragement, comments, support, views and opinions during the course of completing this task.

Endless thanks also to my beloved father, mother, and siblings for unwavering support and understanding have contributed a lot to my studies and the project paper.

Thank You and May Allah Bless We All

ABSTRACT

This article investigates the relationship between emotional intelligent and job satisfaction. The determinants of emotional intelligent that have been examined under this study include well-being, self-control, emotionality and sociability. The sample had been distributed 150 samples which consist of the employees at Perbadanan Putrajaya. The results show there is a significant relationship between three of the constructs tested which are well-being, self-control and sociability. Meanwhile, emotionality shows that there is no relationship with job satisfaction.
