

ANNUAL REPORT

Faculty of Business Management

2010

Dean's Message

Conventions demand that we as a faculty to prepare and disclose annual report to show that as an organisation we are dynamic and aim to move constantly to higher level.

Since its inception as a business school, the Faculty of Business Management has developed into a professional unit concerned with training and educating future corporate business leaders in the theory and practice of their respective business field.

The main objectives of the Faculty are to provide relevant courses and programmes of high quality for business students, and to develop new knowledge through research and wherever possible to encourage application of its findings. To this end, over and above their services as lecturers, the academic staff of the Faculty has been a continuing source of notable scholarly publications and it is a special strength of the Faculty that it brings a fine research staff to the teaching of undergraduate as well as graduate courses and programmes.

The Faculty acknowledges its obligation to community service. The Faculty makes a special commitment to foster training, and basic and applied research that will benefit corporations and government agencies.

In this annual report we have tried to be as comprehensive as possible to cover activities throughout the 2010. We intend to give our stakeholders information about the Faculty's academic and non academic activities and let them judge our performances. We hope the details provided in the report are of use to stakeholders - within and without UiTM - and non stakeholders to understand the Faculty's position and future direction.

Thank you.

Prof Dr Noormala Data' Amir Ishak
Dean
Faculty of Business Management

VISION OF THE FACULTY

To be the best Faculty of Business Management in Malaysia which is of international standard, professional and competitive in terms of teaching, training, research and consultancy and publication.

MISSION OF THE FACULTY

The Faculty of Business Management strives for academic excellence based on quality work culture by:

-  Offering comprehensive programs which meet the needs of industry and the nation
-  Strengthening the Faculty's human resources who are capable of producing research and consultancy work of international standard
-  Producing graduates who are professional and competitive who meet the needs of industry, in an environment that is conducive for teaching and learning
