

**THE IMPORTANT OF PROCESS SAFETY TOWARDS
STAFF AT OPTIMAL GROUP OF COMPANIES.**

AMIR IRSYADUDDIN BIN SAZALI

2009603642

A graduation Exercise Submitted to the

Faculty of Business Management

University Technology Mara, Malacca City Campus

As a partial fulfillment of the requirement

For Bachelor of Business Administration (Hons) Insurance

MAY 2011

ACKNOWLEDGEMENT

'Praise to Allah, the Merciful, the Beneficent'

Alhamdulillah, I am grateful to ALLAH S.W.T for blessing and given me opportunities in completing this practical report tremendously and wonderfully.

Preparing and completing this practical report given one meaningful and unforgettable experience to me. Although this is just the practical report about my practical training, but I need to study and focus in the problems that related to organization itself.

Thanks to Allah for giving me courage, time and knowledge in completing this project paper. First of all, I would like to thank my respected advisors, Sir Rizuwan Bin Abu Karim and my second examiner for her guidance, support and assistance in completing this research project. Therefore I may finish up the research on 'The Important of Process Safety Towards All Employee Staff in Optimal Group of Companies'. I would like to extend my appreciation to my supervisor Mr. Saiful Hafizi Husin, Manager of Distribution Department, for his comments, advice, and constructive criticism in the preparation of this report and also throughout the year.

Special thanks owes to all highly committed, and experienced Coaches for your support and guidance. I truly learnt a great deal for your wealth of knowledge. To those who volunteer participated on my survey, I offer sincere thanks.

This report represents once more the combined assistance of loyal and helpful family and friends who had gave love, encouragement, faith, hope and sacrifice and these encouraged me to complete the project paper successfully.

Finally I would like to thanks to all paties who are directly or indirectly involved in the completion of this study. Every single valuable information that they had supplied me with is highly appreciated. Without your involvement, this study would not be successful as it is now. Thank you.

CHAPTER 1

INTRODUCTION

1.0 INTRODUCTION

In this chapter, it will discuss about the background of company and background of study.

This chapter also identified the problem statement and clearly defined the objective of study significant of study, limitation of study, and lastly the definition of term. The Egan report Rethinking Construction (DETR, 1998) stated that safety record of construction is the second worst of any industry and suggested that accidents can account for 3-6 per cent of total project costs. Injuries, accident and dangerous situations are commonplace. Over the last 20 years the construction industry has suffered a poor health and safety record. While the number of fatal accidents declined throughout the 1990s this must not encourage any sense of comfort and commonplace. Over the last 20years the construction industry has suffered a poor health and safety record. While the number of fatal accident declined throughout the 1990s this must not encourage any sense of comfort and commonplace. The rates of death, serious injury and ill health are still too high (HSE, 1997). The industry has a perpetual and challenge to deliver and maintain a safe working environment. Effective safety management demands a clear vision, a sysmetic approach and a sustained commitment to improvement.
