EXECUTIVE SUMMARY

Industrial training is a crucial part of a student's education. When it's well-planned, executed, and evaluated, it greatly helps in developing a professional attitude. I am required to complete 6-months of industrial training, before finishing my bachelor's degree in international business. My training will take place from March 3, 2025, to August 15, 2025, at Data Solutions Sdn. Bhd in Kuala Lumpur branch. Data Solutions Sdn. Bhd is a company under The Legal Review Sdn. Bhd. For my personal growth, I chose a company that would teach me many things related to my field of study, International Business. The company provided opportunities to apply what I have learned as a student and to develop the skills I need during my internship.

The program aims to provide essential practical experience for students pursuing a bachelor's degree in international business. It bridges the gap between theoretical studies at the university and real-world operations in the human resources sector, allowing students to gain hands-on experience in various tasks. During the internship, several methods were employed, including practical work, reading relevant materials, and engaging in question-and-answer sessions. I was assigned to the operation department as an admin. This department in a way are related in the subject that I learned in university such as strategic management, research method, business analytics and others. The internship taught me how to professionally interact with both local and international investors, as well as the appropriate settings for such interactions.

Additionally, the department trained me in recording data and research related to business analytics, which is crucial for sustainability. Furthermore, the internship offered invaluable life lessons, revealing the realities of the working world. It broadened my perspective, allowing me to understand both the positive and negative aspects of professional life.

ACKNOWLEDGEMENT

First, praises and thanks to Allah, the Almighty, for His showers of blessings throughout my work to complete the industrial training report successfully. I would also want to express my heartfelt gratitude to Data Solutions Sdn. Bhd for providing me with this amazing opportunity to work as an intern in their organization.

I would like to express my heartfelt appreciation to my industrial training supervisor, Mr. Irawan bin Sarip, Head of Operation department, for allowing me to complete my industrial training under his supervision and for providing essential support throughout the program. His dynamism, vision, sincerity, and motivation have profoundly inspired me. He has taught me a great deal about the tasks in the department and the company itself. It was a privilege and an honor to work and study under his guidance, and I am extremely grateful for everything he has offered me. I also want to extend my thanks to my advisor, Sir Farhi bin Razali, who, despite his busy schedule and lectures, took the time to listen and assist me in preparing my industrial report. This report would not have been as successful without his support.

I am also deeply grateful to my parents for their love, prayers, and care. And sacrifices, as well as their continued financial and emotional support, especially during all the time I am studying away from them. Their unwavering support has been instrumental in helping me complete my industrial training and this report. Without them backing me, I would not have been able to achieve what I have today.
