EXECUTIVE SUMMARY

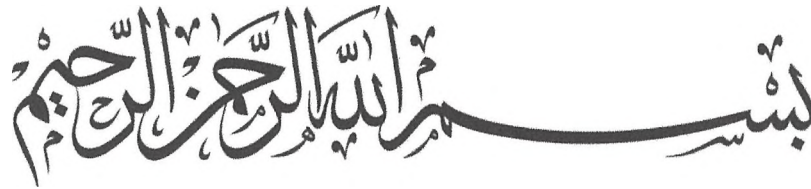

This technical report gives an in-depth look at my internship at Data Solutions Sdn. Bhd during my last year as a business student at Universiti Teknologi Mara. The report covers a variety of areas of my internship, such as the company profile, the projects I worked on, and the significant insights and skills I learned over the internship time. My internship mostly comprised working on a record cases. These experiences enabled me to apply the theoretical information I had gained throughout my academic studies to real-world circumstances, providing me with significant insights into the practical sides of my area.

Throughout the internship, I had the honour of working under the supervision of Mr Irawan Bin Sarip, whose mentoring and skills were important in moulding my professional development. My encounters with the whole operation team were invaluable since they provided me with the opportunity to work with knowledgeable individuals who willingly offered their expertise and experience.

My experience at the company provided me with a stronger grasp of the corporate culture, effective teamwork, time management, and problem-solving abilities, in addition to project-specific learning. These soft talents are equally important for personal and professional growth.

I am really thankful to everyone who helped and directed me throughout my internship, and I am looking forward to implementing the information and skills I have gained to positively contribute to future endeavours in the field.

ACKNOWLEDGEMENT

First and foremost, I want to express my heartfelt appreciation to Encik Irawan in Sarip for providing me with the opportunity to participate in this important programme at Data Solutions Sdn Bhd. His guidance, help, and understanding have all contributed significantly to my professional development and industry knowledge. Furthermore, his invaluable advice, constructive criticism, and encouragement have been tremendously beneficial to my development at this time. I'd like to thank the whole Operations Department of Data Solutions Sdn Bhd for their kind welcome, teamwork, and willingness to share their knowledge with me. The department's character of teamwork, collaboration, and companionship, which has created a positive learning environment, has substantially improved my learning experience.

I owe my coworkers and fellow interns at Data Solutions Sdn Bhd a debt of appreciation for their compassion, support, and opportunity to grow alongside us all. Collaboration on projects, sharing ideas, and having the opportunity to work with such talented individuals has been quite illuminating. I'd also want to thank UiTM and my academic supervisor, Dr. Mastura binti Roni, for making industrial training a mandatory component of the curriculum. My internship provided me practical experience and hands-on learning that enhanced the academic information I had gained in my studies. I would want to offer my deepest appreciation to everyone who assisted in making my industrial training experience possible once more. I am really thankful for the opportunity to work and learn with each of you, as you have all had a significant impact on my professional development.
