

ACKNOWLEDGMENT

First of all , I would like to thanked God because given me and my my friends this opportunities to experience ourselves the industrial training program also helping us to complete this tasks just in time. Even though we faced some obstacle along to complete this tasks , we still managed to complete it perfectly.

Next , I would like to thanked all of my professors especially to Mr Muhammad Syukrie Bin Abu Talip for being such a great guider. He had given us appropriate example and knowledge in order to make us understand more about this industrial training. We do take some examples and ideas from the past year's student as a guide for us to making our own report, Besides , he also ensure we do understand everything he told us and all the explanation before we begin with our practical report.

Third , I also thanked the Samarahan Plantation especially to Mr Choo Yee Ching and all of the staff for given us this opportunities and the permission for doing our practical in their estate.

Not to forget , to my family and friends who tried their best to always given us the support that we need for me either by giving me a lot of encouragement for keep up with this tasks or supporting me financial to support all the cost that required in order to complete this industrial training programs.

Last but not least , I would like to thanked all the group members which is willing to sharing their opinion , knowledge and ideas in order to completing this report.

INTRODUCTION

As we all know , the internship or industrial training program provide real world experience to those who looking to explore or gain the relevant knowledge and skills that required to enter into a particular career field. As for me and my friends , we do internship at the Samarahan Plantation Sdn. Bhd for 3 months and gained much knowledge from it. Internships or industrial training are relatively short term in nature with the primary focus on getting some on the job training and taking what's learned in the classroom and applied it to the real world or situation. Interns generally have a supervisor who assigns specific tasks and evaluate the interns overall work.

Interns can be in a high school students or the universities student or even adults who interested in trying out the new career. Many of the college students who do internships gain a relevant knowledge and experience in a a particular field as well as to get exposure to determine if they have a genuine interest in field. Internships are the excellent ways to begin to build those important connection that are invaluable in developing and maintain a strong professional network for the future.

The objective of industrial training are firstly will helps the student to get their own experience and knowledge , to apply the techniques that been taught in the class in a actual situation. Next to used the experience that gained from this industrial training in discussion and to give the student feels the work environment. Last but not least , with all the experience and knowledge acquired , it is hope that all the students will be able to choose appropriate work upon graduation.
