ACKNOWLEDGEMENTS

Praise to Allah SWT for strength, health and opportunity given to me as without Him, I might not able gone through all obstacle during my practical and study. I felt bless and grateful that I could finish this task given on time.

Moreover, we would like to express our gratitude to our lectures that include in this subject Industrial Training 2 (FPA310) and our supervisor during practical, Encik Kamarudin Bin Karim, our supervisor, Dr. Viduriati Sumin and all of our lecturers for their tutoring and knowledge. Their tolerance in giving all the knowledge regarding this industrial training with each subject that related from semester 1 until the end of the semester.

Not to forget, a lot of thanks to our parents that always give us support in vary way and pray for us to complete this report from starting until the end of this report. To the entire of batch 35, thanks for being a good friend for this 5 semester that always give a support and solution when we have a problem in settle up this report. Thanks for sharing your opinion, solution, ideas and information in completing this report.

Last but not least, thanks to Universiti Teknologi Mara Sabah and Sabah Land Development Board Company that allow us to undergo the industrial training to gain an experienced. To all staff of Regional Office Keningau and Bingkor Office, we really appreciate your support and knowledge that you all gave us from the first day until the end of the industrial training.

1.0 INTRODUCTION

Every part four student of Faculty of Plantation and Agro technology will undergo the industrial training right after finishing the semester 4 season and will undergo industrial training for 1 month and 1 week on the semester break. This is to complete the syllabus of course FPA310 which will very important to student CGPA.

The main objective of industrial training is to expose student to actual working environment and enhance students' knowledge and skills from what they learned in the University life. Another purpose of this program is to install the good qualities of integrity, responsibility and self-confidence. Other than that, industrial training will help student to get the job ready faster.

The place that we choose for our practical session which is me (Alfio Rinool Jool) and Alissa Julius is at SLDB Keningau. The reason why we choose SLDB Keningau as our internship programme place is because we are also live at Keningau and it will easier the way we go the work as we are already familiar with area in Keningau. We also choose SLDB for our internship place because we want to take a real experience working at the oil palm plantation.

1.1 Agency Background

The LKTNS was established in 1969 as one of the numerous statutory bodies under the Chief Minister's Department, formed to implement Sabah's rural development programme. From its inception (1969-1982), it has been one of the major governmental agencies entrusted with the development and re-settlement schemes. The SLDB Keningau is located at KM6 Jalan Keningau Apin-Apin and the headquarters is a Wisma Sabah Land Development Board, Jalan Kelapa Sawit, 4 KM Off Tuaran Road. Entering the Ninth Malaysia Plan period (2006-2010), the agricultural sector become the third engine of growth in Malaysia. Involvement from large-scale commercial farming was again focus on the community development 'Gerakan Desa Wawasan' a national agenda to fully eradicate poverty in Malaysia, which is part of the mandate of the new LKTNS. Figure 1.1 shows the logo of Sabah Land Development Board.
