Acknowledgement

Thanks be to God for His blessing and His guidance which enabled me to complete my industrial training, completing the writing of this report and will entitle me to receive my diploma.

On 5th of December 2016, I have started my industrial training at Stesen Penyelidikan Lembaga Getah Malaysia Similajau and ended on 10th of March 2017. I have learned a lot of things throughout the past 3 months. I would like to give my thanks to the most precious person in my life, which is my parent, En. Steven Ragey and Madam Doroty Jalan for their endless moral support and also in term of financial support.

As for my lecturer so do called as my supervisor from Universiti Teknologi Mara (UiTM) Sarawak, En. Muhammad Syukrie bin Hj. Abu Talip, thank you for the knowledge and also guidance that you give during my training and also helping me by giving me some opinions in order to complete my industrial training report. Last but not least, to my industrial general manager, En. Salihin bin Sekot, my supervisor in-charge, En. Mohd. Ashraff bin Ramli, En. Giring Ak January and En. Thomas ak Ningkan and also Mdm Siti ak Awang, my administrative and accounting supervisor in-charge. Thank you for all the advice and guidance as I'm working here as trainee. To all the Lembaga Getah Malaysia Similajau's staffs, big thanks I said for the warm welcomed and a very nice hospitality that had been provided for me in order to complete my industrial training.

During these 3 months working at Lembaga Getah Malaysia as a trainee, I am exposed to many new experiences which are very valuable for me to learn and carry out when I face the real world of working in the future. The reason for us as a student doing or having our industrial training is to expose us to the work life before we graduating soon. By doing so, we will know how to adapt and communicate with other people who are on the same field as we are or with those who will work as a team with us. The period that each student undergoes for an industrial training cannot be used as a measurement because what is gain and knowledge that we obtain during the training is the most important thing.

1.0 ORGANIZATION BACKGROUND

 Malaysian Rubber Board (MRB)

The Malaysian Rubber Board (MRB) is the custodian of the rubber industry in Malaysia. It was established on 1st January 1998, it has under its fold there well establish agencies (RRIM, MRRDB and MRELB), which are now merged into one, which have contributed significantly to the development of the rubber industry for the last 78 years. The R&D excellence in Natural Rubber, accomplished by the Rubber Research Institute of Malaysia (RRIM), has an impact on the Malaysian NR producing countries.

The primary objectives of MRB is to assist in the development and modernization of Malaysian rubber industry in all aspects from cultivation of the rubber tree, the extraction and processing of its raw rubber, the manufacture of rubber products and the marketing of rubber and its products.

15.0 Conclusion

The three months of my industrial training had taught me that the real job life is far away different from student life. We have been exposed to a lot of things that we never being taught in class. The environment also different. Communication is the most important thing as it will help us to reach that understanding between the members. The good relationships and bonding between the staffs and me make me feels like I'm home because of their warm welcome. Lastly, thank you again for the knowledge that they gave to me. To those who involve either directly or indirectly, your supports are much appreciated. Thank you.
