PRACTICAL TRAINING REPORT

MUKAH DIVISIONAL AGRICULTURE OFFICE

(5 DECEMBER 2016 - 10 MARCH 2017)

NAME : KELINAN ANAK UBIH

MATRIX NUMBER : 2014850514

I/C NUMBER :

Table of contents :

Bil.	Contents	Pages
1.	Chapter 1 : Introduction to Practical Training	
	1.1 Introduction	1
	1.2 Objectives of Practical Training	1 - 2
	1.3 Practical Training Report Objectives	3
	1.4 Importance of Industrial Training	3
2.	Chapter 2 : Company Background	
	2.1 Introduction of a company/firm	4 - 5
	2.2 Organization Background	6
	2.3 Organization's Vision	6
	2.4 Organization's Mission	6
	2.5 Organization's Theme	6
	2.6 Organization's Core Value	6
	2.7 Function , Service and Products	7
	2.8 Organization Official Logo	8
	2.9 Organization Office Hours	9
	2.10 Organization Chart	10
	2.11 Department in a company	11 - 29
3.	Chapter 3 : Task Assigned	
	3.1 Introduction	30
	3.2 Time Table	30
	3.3 Task & Assignments	31 - 91

4.	Chapter 4 : Comments & Suggestion	92
5.	Chapter 5 : Conclusion & References	
	5.1 Conclusion	93
	5.2 References	94 - 97
6.	APPENDIX	98 - 106

CHAPTER 1 : INTRODUCTION

Industrial Training module is a main component in the learning curriculum for University Technology MARA (UiTM) of the Ministry of Higher Education (MOHE). Industrial Training is one of the compulsory courses for every UiTM students under the Faculty of Plantation and Agrotechnology. Every students bounds to be involved in industrial training for one whole semester in order for him or her to get his or her diploma certificate.

1.1 Preliminary

The industrial training was carried out at a firm or an organization whether the students choose it or it is given to them for one whole semester. The main purpose of the industrial training is to produce graduates who are ready and capable to face their profession academically or non-academically with high professionalism appearance.

Other than that, the industrial training exposes the students about the real situation of the working class citizen. The industrial training also helps in developing social skills in the students.

1.2 Industrial Training Objective

1.2.1 To expose the students to the real life working experience and expanding the knowledge in their specific field.

- i. Students will further learn about their real life profession. They will also learn what they need to do in order to finish their works. This will prepare the students so that they will easily fit in and fulfill the demands of their profession after they finish their course.

1.2.2 To make use of the theory and learned in the university.

- i. Students are only exposed to the basic theory and needed in the fields of their own. These theories and were mainly according to the books. With the industrial training in place, students will experience real life situation in the field. This will make the students use their knowledge in order to get their works done.

Conclusion

Industry training undergo by the students is one of the best approach, given to students before the actual face of the work place. Industry practice is to provide new challenges and benefits to students. By engaging in a real working environment, then a student will be aware of the importance of knowledge and attitude to his/her own work.

As a student of University Technology Mara (UiTM) Mukah Campus, I am very grateful for the opportunity to undertake practical training for three months at Mukah Divisional Agriculture Office from 5th December 2016 until 10th March 2017. I have gained much knowledge and experience from Mukah Divisional Agriculture Office staffs.

During my industrial training in government office, in a way has given me a very valuable experience and I was able to practice the that theory taught at the faculty and was assigned with a various tasks and responsibility for the work related to the course that I participated in the UiTM. Although the industrial training period is short, I was able to learn new skills and all the lessons given by the staffs are very useful for me as preparation to face the real working environment in the future.

Early exposure to the working environment is good for students so that they can open their mind and accept challenges from the supervisors bravely. Besides that, this industrial training will provide sense of responsibility in each students because they will cooperate with others students and staffs in a grouping activities. Hence, they can improve their public relations skills with their future colleagues.

Furthermore, the students should be able to identify and address any problems that arise in real situations with a professional manner. At the same time, they enable to improve the ability to think and self-reliant in resolving any problems encountered.

Therefore, I strongly support this industrial training programs because it will bring many benefits to the students themselves and the community generally.
