JULY 2025

UiTM PERAK : POSTGRADUATE STUDENTS' ACADEMIC VISIT TO SHANGHAI, CHINA

From 17 to 23 April 2025, our Master of Architecture (CFAP773) students from UiTM Perak, accompanied by their lecturer Mr. Md Anwar Md Yusof, participated in a highly successful and enriching visit as part of their academic exploration initiatives. The objectives of the program are:

- To provide students with exposure to high-rise building design practices (Practice Architects) in an international environment.
- To fulfil the teaching and learning requirements of the CFAP773 course.
- To emphasize the importance of industry exposure and industry requirements for CFAP773 students.

We would also like to extend our heartfelt appreciation to the Top Management of UiTM Perak, especially our Rector, for the full support given to this program. Additionally, a heartfelt thank you to IPSIS UiTM Shah Alam for providing partial funding to support our students' activities, making this memorable learning journey possible. A comprehensive event report was also prepared by ZHIMU JIANGZHU Design Co., featuring highlights of the engagement, key discussions on high-rise building design principles, and reflections from the participating students.

We are proud to see our students gaining global exposure and professional insights through initiatives like this, and we look forward to encouraging more future opportunities!
